During the past year the Farmers Home Administration advanced more than \$350 million dollars in operating capital to Pennsylvania farmers. Each loan is accompanied by technical assistance in farm and financial management.

Other improvements which are brought about by recent legislation include provisions that will enable the Farmers Home Administration

to participate with other lenders in making operating loans, and authority to make emergency loans in area where a natural disaster has affected only a few farmers. Previously emergency credit was available only in areas where the damage has been widespread, Hoover added.

The cheapest way to learn is to observe the errors of others.

**PROTECT CALVES**

Get feeder calves off to a good start for profitable gains, urges Samuel B. Guss, extension veterinarian at Penn State. Protect them against shipping fever promptly, and unload the calves into a well-bedded comfortable barn or shed. Feed them clean, bright grass hay and a little grain, and let them quiet down and rest a few days after arrival on the farm.

**Peppy OLIVER  
3-4 Plow 770**

All new and all set to go, ready to turn out more work in a day and to make it easier for you.

First of all, there's more horsepower in this new 770, coming from a deeper-breathing, higher-speed engine. Add the new Power-Booster Drive and you get 12 forward speeds, almost one-third more pull for heavy going at the touch of a lever—on the go.

Hook a new 4-bottom semi-mounted No. 5440 plow to Oliver's new Power-Traction Hitch and forget about the tough spots. Your 770 just bears down, steps right through at full speed. Put on Powerjester wheels; let the engine change tread. And make driving a pleasure with power steering.

This is only the beginning. There's a lot more to see in the new 770. You'll want to feel this snappy power, too—in all the exciting new ways.
