\$2 Per Year

FRED FREY EXHIBITS HIS CHAMPION steer in the on-foot phase of the carcass steer show at the Pennsylvania Livestock Exposition this week. After winning the on-foot show, the summer yearling went on to place fourth in the judging on the rail. Frey feeds Angus cattle on his farm at Quarryville R2.

County Stock Showmen Return With Trophies

Lancaster County livestock showmen returned to the Meadows Farm, Bareville R1. The yearling ram was the first champion ever shown at the Livestock Exposition by Norman, Edward and Arthur Hess, owners of Green Meadows.

In the hotly contested carcass steer class, Fred Frey of Quarryville R2 took the on-foot honors with a junior yearling. He then teamed the champion with two other steers to take the Get of Sire class.

After the steers were slaughtered and judged on the rail, Frey's trim Angus stood fourth in the class. Previously Frey had won the on-foot championship three times and his entries had gone on to take the on rail championship on two occasions.

A championship in the Hampshire sheep judging was brought home by Green

Meadows Farm, Bareville R1. The yearling ram was the first champion ever shown at the Livestock Exposition by Norman, Edward and Arthur Hess, owners of Green Meadows.

Green Meadows also placed first in Pen of three yearling ewes, Pen of three ram lambs and exhibitor's flock.

The wins won for the county breeders the show's top award, the premier exhibitor's banner.

In Suffolk sheep judging, Mrs Milton K. Morgan, New Holland Pike, took a red ribbon with her young ram and several other ribbons in the ewe competition.

C Warren Leininger, Denver R2, exhibited the grand champion boar in the Spotted Poland China classes, repeating his last year's win. He also had the champion light- (Continued on Page 13)

FARM-CITY WEEK

Partners In Progress Is Theme

University Park, Pa. — Many people don't realize that farming is America's greatest single industry, declares Lyman Jackson, dean of the College of Agriculture Penna. State University.

Even though farmers comprise only about 10 per cent of the U. S. population, approximately 40 per cent of our nation's total labor force is either on the farm or is working for those companies that process and distribute farm products.

For this reason, Dean Jackson believes it is especially important for all Americans to join wholeheartedly in the observance of the annual Farm-City Week, Nov. 17 through Nov. 23.

"Leaders of all segments of American life — agriculture, business and labor," the

Dean claims, "all agree that our country can be strong only if we all work together in peace and in harmony. Sole purpose of Farm-City Week is to bring about a better understanding of all parts of our economy."

Theme of this year's Farm-City Week is "Partners In Progress," so the Dean urges all citizens of the Commonwealth to participate to the limit of their capability in whatever events are planned locally to celebrate Farm-City Week. He says, "When the farmer's problems become the active concern of those in the city, and the city dweller can gain the interest of the farmer, a greater understanding of cooperative action develops. We can accomplish this goal through active support of Farm-City Week."

Agronomy Guide Changes Rodent Control Explained At Meeting Meet Scheduled

There is no reason why clover won't last as long as alfalfa in our rotations, a Penn State University specialist told agronomy dealers Thursday at Mount Joy.

Henry Menusan, Extension Entomologist from the Penn State University said, "I am pretty well convinced that if we make soil applications of insecticides our clover will stay with us much longer."

Menusan reviewed spray recommendations in the 1962 Agronomy Guide, published by the University and now available at the office of the County Agent. He told the 50 dealers, custom spray operators, field men and seedsmen that Penn State research supports the recommendation of a spray of Dieldrin rather than application of the granular material on alfalfa for the control of alfalfa weevil during the month of November. Menusan said the spray is cheaper and will give better control than either the granular insecticide or the granular insecticide and fertilizer. He said there would be no spring recommendations for the control of alfalfa weevil.

Recommendations for the control of spittle bug on alfalfa where weevil is not a problem will be Lindane, Menusan said. "There is still nothing that approaches Lindane for spittle bug control," he said.

Menusan, one of the seven experts who spoke at the meeting, said to the spray operators, "Remember, you are not spraying to kill insects. You are spraying to get better forage and a higher yield." You can kill more insects after the crop is half eaten, he said, but you will take a beating in quality and yield if you wait that long to spray. He said a farmer (Turn to page 16)

The Lancaster County Extension Service rodent control meeting postponed from last week has been rescheduled for Tuesday, November 14 at 2:30 p.m.

The poison material which was to be mixed with wheat did not arrive at the office of the county agent in time to be mixed for distribution at the previously announced date. For those who have (Turn to page 4)

Prod. Credit Annual Meeting Is Next Week

Three directors will be elected at the annual meeting of the Lancaster Production Credit Association and the Federal Land Bank of Lancaster next week.

Balloting for the directors will take place at the meeting on November 14 in the Refton fire hall at 7:45, but ballots will not be counted until after the final annual meeting of the organization in Dauphin county on November 16.

The Lancaster County meeting, which is open to the public, will have as the featured speaker, Mr. H Grant Hurst, who will have as his topic, "Developing A Sense of Humor."

ACCEPTING A CHECK FOR THE 4-H Club Fund is Victor Plastow, left, Associate County Agriculture Agent. Mrs. Walter Overgaard, secretary of the Lancaster County 4-H Leaders' Council makes the presentation of the check on behalf of the leaders. The donation of \$1,024.37 represents the proceeds at a chicken barbecue sponsored in September by the leaders council. At a meeting in early summer, the leaders voted to hold the event in an effort to help the county 4-H raise some funds toward the \$1,700 to \$1,800 needed annually for trips, premiums, ribbons, engravings and trophies presented to 4-H club members during the year. Club leaders prepared and served approximately 1,200 halves of chicken from which they realized a profit of \$849.23. An additional \$94.18 was received from booths sponsored by local 4-H clubs at the barbecue. Clubs without booths contributed another \$80.33 to the fund. —L. F. Photo

Ag. Center Picks District Heads

Chairmen have been secured for all of the 36 "Districts" of the County, for the conduct of the Lancaster County Agricultural Center Fund Campaign. This announcement was made, today by Levi H Brubaker and Leslie S Hubbard, General Co-Chairmen of the appeal.

Those named to head units of volunteer solicitors in- (Turn to page 11)

FIVE-DAY WEATHER FORECAST

Saturday - Wednesday
Near seasonal normal temperatures are expected during the next five days. Normal temperatures at this time of year range from a low of 38 at night to a high of 55 in the afternoon. A warming trend during the early part of the period will give way to cooler weather near the end of the period. Little or no precipitation is expected.
