Latest U.S.D.A. Summary Shows How Well

K-137 Kimberchiks had the best laying house livability of the 165 stocks entered in the Random Sample Tests completed in 1960, according to a recent U.S.D.A. report (ARS-44-79-1). The companion K-155 Kimberchiks also lived well above the average entry, as the graph at right shows.

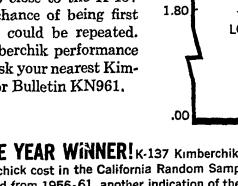

Kimber CHIKS.

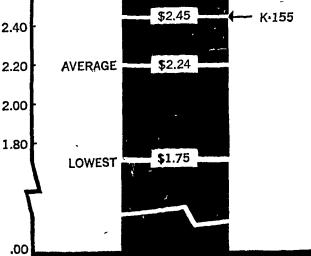

Kimber CHIKS.

INCOME OVER FEED AND CHICK COSTS \$2.60 HIGHEST _ K-137

K-137 Kimberchiks laid so many eggs and of such size that they had the highest income producing ability among the stocks entered in the 1959-60 Random Sample Tests, according to the U.S.D.A. summary. The K-155 was so close to the K-137 that it had an even (1:1) chance of being first in income if the same tests could be repeated. For more details about Kimberchik performance as reported by the U.S.D.A. ask your nearest Kimberchik associate hatchery for Bulletin KN961.

FIVE YEAR WINNER! K-137 Kimberchiks had the highest income over feed and chick cost in the California Random Sample Egg Laying Test for the five-year period from 1956-61, another indication of their consistent performance.
