**● Poultrymen**

(From page 1) monthly meeting in the Poultry Center. Treasurer Daniel Good, reported that despite a reduction in expenses during the year, a deficit of \$3,686.83 was sustained by the association during '61. A decline of approximately \$3,000 in receipts from sale of "Barbecue Chicken and smaller listings on the exchange were blamed for the net loss. J Collins McSparran, Master of the State Grange, was speaker of the evening. President Mark Myer conducted the meeting.

and Earl Harnish. Along Rt. 222 a mile S of Quarryville Diller and Kreider, Aucts.

**HARSH HYDRAULIC HOISTS**

The 32 available models come to you with a wide range of lifting capacities ranging from 3/4 to 20 tons for your truck, pickup, or trailer. The smooth, trouble-free action of a HARSH HOIST has a fast lifting time of from 12 to 160 seconds, which allows more time for actual hauling.

These hoists come to you at an average cost of only 16¢ a day as compared to the \$10-\$15 a day you now spend to manually unload your truck.

To design and build a light-weight, low-costing truck hoist suitable for all types of farm use, priced within the average farmer's budget was the aim of "Bud" Harsh when HYDRAULICS UNLIMITED MFG. CO. began operations. This hoist was built and is now in use throughout the nation.

The HARSH HYDRAULIC HOIST averages only \$328.52 (including Federal excise tax) and maintains a low taxable weight which averages 273 lbs. These economical hoists are built for either back or side dumping, depending upon your need.

Save costly time and eliminate back-breaking labor by unloading with a HARSH HYDRAULIC HOIST engineered for economical, speedy, and durable farm use.

**COWS PROPERLY CONDITIONED**

**... during the dry period PRODUCE UP TO 25% MORE MILK!**

**BEFORE CALVING** This cow was fitted on the Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.

**AFTER COMPLETING RECORD** The same cow after having produced 23,044 lbs. of milk and 941 lbs. of fat as a 4 year old. Note the extreme dairyness and exceptional body condition shown after this cow produced 1 1/2 tons of milk!

**600 pounds of PIONEER DRY and FRESHENING yields an extra TON OF MILK!**

Proper feeding of the dry cow is the most important single factor affecting herd health, longevity, and a sustained high level of milk production. In 60 days, while the cow is dry, Pioneer Dry and Freshening feed will repair the body from the previous lactation, build a reserve of body condition for the next lactation, and develop a stronger calf. In addition your cows will have less calving difficulties, eliminate placenta quickly, have less udder congestion, and most importantly they will produce up to 25% more milk!

See us today for full particulars.
