

● **Now Is The Time**

TO BUY DISEASE RESISTANT TOBACCO SEED . . . Local growers are urged to recognize the value of the two new varieties of tobacco released last spring. Both the Pennbel and the Pennleaf are resistant to wildfire and the Pennbel also resistant to mosaic. To have this resistance in the seed is one of the best ways of getting rid of these disease problems. Other qualities of these two varieties are such that they are worthy of more acreage each year.

● **Pest Control**

(Continued from Page 1)

The what-to-use, when and how of application for maximum effectiveness will be emphasized throughout the discussions, Lueck said.

The extension specialists will address themselves mainly to problems with field corn, forage crops, tobacco beds, potatoes and tomatoes, lawns and ornamental plants.

The evening program normally held at the same time as the annual spring spray meetings will be cancelled this year, but all farmers and custom spray operators are invited to attend the all day session, Lueck said.

Program for the day is as follows:

9:30 a.m. — Insect Control
J. O. Pepper, extension entomologist

Wool Payment Program Ends On April First

The 1961 wool program incentive payments to be made this summer will cover only wool and unshorn lambs which are marketed before March 31, 1962. Fred G. Sel-domidge, Chairman of the Lancaster County Agricultural Stabilization and Conservation Committee, reminded growers today.

That is the closing date for the 1961 program, which extends from April 1, 1961 to March 31, 1962. Growers will have 30 days after the closing date in which to file their

applications for the payment. The percentage — to be announced later — will be that required to raise the national average price received by all producers for shorn wool during the marketing year up to the incentive price of 62 cents per pound.

Lamb payments will be made to each producer who sells lambs that have never been shorn. The payments will be at a rate per hundred-

weight of live animals marketed to compensate for the wool on them on a basis comparable to the national average incentive payment per pound of shorn wool.

The Chairman emphasized the importance of keeping adequate records on sales, which must support the information on payment applications. Thus, producers' sales records for shorn wool should show name and address of buyer, date of sale, name and address of producer, net weight of wool sold, and net proceeds to producer after normal marketing deductions.

Attention Dairymen!

DO YOU WANT TO INCREASE YOUR HERD PRODUCTION 2,000 lbs. OF MILK PER COW?

HORNCO NEW UNI-PEL DAIRY PROGRAM IS THE ANSWER.

USE UNI-PEL 15% DAIRY AND WATCH YOUR COWS MILK-OUT THEIR BRED-IN ABILITY.

HORNCO'S NEW UNIVERSAL DAIRY FEED WILL FIT YOUR DAIRY PROGRAM.

HORNCO FEEDS

PLEASE CALL OR WRITE US AND OUR DAIRY SPECIALIST WILL VISIT YOUR FARM AND EXPLAIN THE UNI-PEL PROGRAM
