vitamin A

There is convincing evidence among dairymen today that cows need vitamin A—to promote general over-all better health. Cows fed rations fortified with a higher concentration of vitamin A stay at peak production longer . . . are in better condition for calving . . . haulcoats are glossier . . . and young stock grow faster and take their place in the milking line earlier.

For better dairying—feed Red Rose Dairy Feeds with added vitamin A. We carry the complete line.
