

Better Chemicals and Dependable Equipment Pay For Themselves in HIGHER YIELDS and BETTER RETURNS!

For Potatoes, Peas and Beans

Early weed control with Premerge costs less than cultivation!

Applied to bean, field pea, corn and potato crops at planting time or before crop emerges, Premerge* controls weed and grass seedlings when a wet spring delays or makes cultivation impossible. You can eliminate several expensive early cultivations . . . give young crops a head start toward bigger yields. Premerge may actually cost less than tillage, and up to 70% less than other products . . . and since it kills weeds by contact, you can use it on or near many crops susceptible to 2,4-D.

Esteron 99 STOPS WEEDS ...saves moisture and fertility in corn, small grains and pastures

Troublesome weeds can rob your growing crops of needed moisture and soil fertility. Now, you can stop this loss in your corn, small grains and pastures with Esteron 99* . . . a versatile, easy-to-use 2,4-D that's more effective than old-fashioned materials . . . kills a wide range of tough broadleaf weeds easily and effectively. Discover for yourself why more farmers use Esteron 99 than any other brand of 2,4-D. See us today.

And For A low-cost way to control quack grass in potatoes

It's DOWPON*—the economical quack grass killer. Apply just before potatoes come up . . . or in the fall after harvest. Tests prove potato profits can be increased as much as 50% when grass is controlled by Dowpon! That's because Dowpon, sprayed on the leaves, kills the whole grass plant—from the top to the deepest roots—at a rock-bottom cost per acre.
