

## Vegetable Men To Hold Tour

The Pennsylvania Vegetable Growers in cooperation with the Pennsylvania State University Extension Service, are holding a commercial greenhouse vegetable production tour on Tuesday April 24.

According to vegetable growers president, Paul Rowe, Strasburg RI the tour will assemble at the Boyd Mertz greenhouses in Northumberland County at 9:30 am where they will observe tomatoes and lettuce growing under glass. They will also see 2,000 geraniums and other plants.

After lunch the tour will move to the Robert Speigelmeier greenhouses in Mifflin County to observe tomatoes grown under glass and plastic. They will also see potted plants and flowers.

At Sipes greenhouse in Mifflin County the vegetable men will learn how two crops spring and fall of tomatoes are grown under glass.

Extension personnel and research men from the University will accompany the tour to explain cultural practices and other problems in greenhouse production.

## Replace Rotor When Adjusting Distributor Cap

Did you know that you should always replace the rotor when installing a new distributor cap on your tractor distributor?

According to Agriculture engineers, many farmers are being penny wise and pound foolish if they replace the cap without including a new rotor.

Why? . . . Because in normal use, the air gap between the tip of the rotor and the contacts inside the cap gradually becomes wider as metal is gradually eroded away from the rotor top and from the contacts.

Due to the continual arcing of high voltage electricity across the air gap this erosion gradually may reach the point where excessive resistance builds up, preventing full firing voltage from reaching the spark plugs, and causing the plugs to misfire.

Start With The BEST FOR

# EGGS MEAT

DAY-OLD and STARTED CHICKS

CAREY and DEMLER Leghorns for high-quality White Eggs. Carey again won "Highest Egg Quality" award (85 Haugh Units) competing with best American breeders in official Random Sample Tests.

MERRYKNOLL Black Sex-Links and Anderson Golden Sex-Links for Big Brown eggs. Also Cobbs White Rocks.

FOR MEAT Cornish-Cobb White Rock Cross and Vantress-Cobb Cross.

Burling personally supervises every step from breeding to flock management to hatching and delivery of YOUR chicks.

## ● Holstein Cow

(Continued from Page 1)

Lancaster County growers interested in joining the tour may call Strasburg OV 7-7289 for further information. The county group will leave at 7 a.m. and return about 6 p.m., Rowe said.

production testing programs of the Holstein-Friesian Association of America.

The Pennsylvania Holstein's official 365-day production totalled 23,802 lbs. of milk and 1,102 lbs. of butterfat. She

started her testing period at the age of 8 years - 8 months and was milked two times daily.

She is the 261st registered Holstein to hit the 1,000 lb mark on twice daily milking. Roaring Maples Gay Echo was bred in the herd of Harold K. Book, Ronks, Pennsylv-

ania. She was sired by Laumont O R Gay Boy 880723.

Pennsylvania State University supervised the weighing and testing of her production as a part of the Herd Improvement Registry program of the Holstein-Friesian Association of America.

. . . . it's DARI-PAK "A"

JANUARY 14, 1961

Just a little more than a year ago, January 14, 1961 to be exact FARM BUREAU announced a brand new, quality dairy ration - - - it's name was DARI-PAK. This nutritionally balanced, 100% vegetable protein ration proved to be an excellent milkmaker, reasonably priced and palatable, too.

AUGUST 28, 1961

DARI-PAK "PELLETS" were added to our quality line of dairy feeds. We were, and still are, mighty proud of our firm, palatable and productive pellet ration. Careful formulation of our modestly priced Dari-Pak Pellets has paid off - - - they're still growing in popularity!

DECEMBER 16, 1961

ANOTHER Farm Bureau FIRST. On this date we announced the installation of the First Sprout-Waldron "Molasses Blending Device" on our pellet mill - - - this was the first unit of this type installed in Lancaster County. With this new "Molasses Blender" we can thoroughly blend up to 200 pounds of molasses per ton of pellets - - - not just sprayed on the outside.

## NOW . . . APRIL 21, 1962

WE'VE CHANGED Dari-Pak to Dari-Pak "A". More and more research reports show a real danger of Vitamin "A" deficiencies in dairy cattle diets. Why? Because increased grain feeding (and this trend will continue to grow) means less hay consumption and therefore less natural Vitamin A in the ration. Also, increased amounts of nitrogen applied to legumes tends to interfere with the conversion of carotene to Vitamin "A".

Recognizing the importance of an adequate Vitamin "A" level - - - we are now adding STABILIZED VITAMIN "A" (Vitamin A Palmitate) to:

14% DARI-PAK Coarse Texture

16% DARI-PAK Coarse Texture

36% MILKMAKER SUPPLEMENT

14% DARI-PAK Pellets

16% DARI-PAK Pellets
