

## County Boy Is Cited By Breed Assn.

Donald B Trimble of Quarryville, Pennsylvania's Champion Holstein Boy, was one of four finalists in a national contest conducted by The Holstein-Friesian Association of America

In announcing the results, Executive Secretary Robert H. Rumler said that an all-time high of 29 contestants, nominated by organizations of the black and white dairy breed in as many states, participated in the event

Allan Shepard of Pennfield Township, Michigan, was named National Champion Holstein Boy in judging based on record-keeping, leadership, in-

genuity and variety of interest as well as progress in establishing a herd of registered Holstein cattle.

Finalists, in addition to Trimble, were Henry Beneke, Millbrook, New York; Ronald Boldt, Seneca, Illinois, and John L. King, Jr., Gaithersburg, Maryland

Donald, 19 year old son of Mr. and Mrs. Daniel E. Trimble, started out in 4-H with a heifer given him by Larnie Benjamin, his parents' landlord.

He went on to build a herd of 22 registered Holsteins valued at \$9,250 during eight years of dairy work in both 4-H and FFA

As sidelines, he also completed projects in corn, barley, wheat, hay, pasture improvement, onions, tomatoes, hogs and poultry

Prominently successful in both 4-H and FFA Trimble served as a Pennsylvania delegate to the National FFA Convention at Kansas City and the National 4-H Club Con-

gress at Chicago.

He holds the Keystone Farmer Degree, representing the highest attainment possible in state FFA circles, and was a member of the Pennsylvania 4-H dairy judging team that placed fourth in national competition at Waterloo, Iowa last fall.

Since graduating from Southern Lancaster County Joint High School in 1960, Trimble has been farming a rented 60 acres on his own.

Last year, his 11 cows, almost all first and second calf heifers, averaged 11,422 lbs of milk and 436 lbs of butterfat on DHIA test

He also feeds out 150 hogs a year, grows alfalfa, corn and barley and, quite understandably, believes there's still a future in farming for those who want to work for it.

In 1960 a milk cow producing more than 4,000 pounds of milk was exceptional. Average production per cow now is 7,000 pounds per year

### Fray-Defying Collars

Longer lasting collars and cuffs for men's cotton wash-and-wear shirts are fast taking the place of the turned shirt collar. Bernice Tharp, Penn State extension clothing specialist, explains that an interliner of wash-and-wear fabric is bonded to outer layers of untreated cotton cloth. Together, these give shirt collars and cuffs the wash-and-wear qualities of the interliner and high resistance to fraying and abrasion of the untreated cotton

"A beatnik's idea of a lovely bride is when her sneaker match her sweater."

for tomorrow's EGGS

Feed is a mighty important factor in profitable poultry raising. A chick is what it eats. If it eats regularly and gets a high quality, balanced ration your chances of raising a top-quality pullet are greatly increased

**Red Rose**

CHICK STARTER

This is an all-mash feed with "high appetite appeal" for chicks from day-old to 6 to 8 weeks — that most important early nutrition period for growing birds

**Red Rose**

STARTER & GROWER

This is an excellent feed for starting and growing laying flock replacements. Feed it from day-old until the birds go into the laying house. It's fortified with vitamin B12, and antibiotic feed supplement plus all the essential nutrients necessary to get chicks off to a good start and grow them into profitable producers

**THIS SEASON — aim for higher production and higher profits.**

## our friends' seed is safe from birds

We sell them **ORTHO Bird Repellent**. They mix it with the seed. Then there's no question of suffering the expense of replanting.

**Crows, blackbirds, jackdaws, grackles, pheasants and larks** don't come back a second time for seed treated with our **ORTHO Bird Repellent**. They spit it out and fly away. And this protection continues even after corn and grain has started up out of the soil.

Actually, the full name of this product is **ORTHO Bird Repellent and Seed**

**Protectant**. It also contains Aldrin insecticide to control soil insects such as wireworms, seed corn maggots and corn rootworm. Fungicide (captan) is in it for extra protection against diseases such as seedling blight, damp-off and seed decay. In fact, it's the **only** bird repellent that combines all three. And it's one of the few that won't cause seed to bridge in the hopper.

This year, don't plant for the birds. Come in or phone us for your **Bird Repellent and Seed Protectant**.
