

Ebensshade Honored Farm Bureau

Ebensshade, 1631 Esbade Road Lancaster — Honored recently for his service to farmers at the annual meeting of the board of directors of the Pennsylvania Farm Bureau Co-

operative Association in Harrisburg last week, Ebensshade received a length of service award, noting his work in serving area farmers in agribusiness.

He has been a member of the Pennsylvania Farm Bureau board of the Lancaster Farm Bureau board for seven years. He represents the local association on the statewide board of directors.

During the business session at the Harrisburg meeting, Ebensshade and other directors studied reports showing that \$246,200 was saved for Pennsylvania farmers in the purchase of their production supplies by Pennsylvania Farm Bureau. The savings after required reserves will be issued as patronage refunds to the retail Farm Bureau cooperatives which made purchases for their

Lancaster Farming, Saturday, May 5, 1962—19

farmer members.

The savings were effected in operations which accounted for the distribution of \$25,100,000 worth of farm production supplies. This volume is an increase of 24 percent over 1960 and the second largest volume in the cooperative's history according to George G. Connor, Pennsylvania Farm Bureau executive vice president and general manager.

of Mrs. Harvey Groff, Salunga.

Each member brought hats trimmed with useful articles for the benefit sale. A total of \$21 was realized from the sales of hats created from such varied raw materials as towels, peach baskets trimmed with picnic equipment, hot pads, spools of thread and vegetables.

The society donated \$5 to the Lancaster chapter of the American Cancer Society. The group will help at the bazaar table at the county convention.

Mrs. Walter Kauffman will be the guest speaker at the May 26 meeting in Kauffman's Tea Room, East Petersburg.

COWS PROPERLY CONDITIONED during the dry period PRODUCE UP TO 25% MORE MILK!

BEFORE CALVING This cow was fitted on the Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.

AFTER COMPLETING RECORD The same cow after having produced 23,044 lbs. of milk and 941 lbs. of fat as a 4 year old. Note the extreme dairyness and exceptional body condition shown after this cow produced 11 1/2 tons of milk!

600 pounds of PIONEER DRY and FRESHENING yields an extra TON OF MILK!

Proper feeding of the dry cow is the most important single factor affecting herd health, longevity, and a sustained high level of milk production. In 60 days, while the cow is dry, Pioneer Dry and Freshening feed will repair the body from the previous lactation, build a reserve of body condition for the next lactation, and develop a stronger calf. In addition your cows will have less calving difficulties, eliminate placenta quickly, have less udder congestion, and most importantly they will produce up to 25% more milk!

See us today for full particulars.
