

Aldrin treated tobacco (right) is approximately 8 feet tall. Untreated tobacco (left) is approximately 5 feet tall.

TOBACCO GROWERS:

Now is the time to apply aldrin to control all major soil insects attacking tobacco for the entire growing season

Low-cost aldrin offers one-shot, season-long control of wireworms, cutworms, and many other soil insects that cause spotty stands, reduce tobacco yield and quality.

Read about the damage these insects cause, how aldrin stops them and how you can use it this year for greater yields of better quality tobacco.

A WHOLE army of soil insects threatens tobacco during the growing season. Wireworms burrow into the stem. Cutworms chew on young plants. White grubs attack the roots.

Aldrin stops them all

A single application of aldrin stops wireworms, cutworms, white grubs, annual grubs, fleabeetle larvae, and most other soil insects for the entire growing season.

By destroying insects before they can do any damage, aldrin allows plants to develop deep, strong, healthy root systems. Leaves mature faster, develop more evenly.

Aldrin-protected plants grow more vigorously. The healthier and more vigorous the plant, the better it is able to resist disease organisms.

Growers find that every dollar spent on aldrin is returned many times over in higher tobacco profits.

How to use aldrin

As little as 2 to 3 pounds of aldrin per acre applied as an overall broadcast treatment before planting will give season-long control of all major tobacco pests.

As little as 1 to 4 ounces of aldrin per 50 gallons of water, applied in the setting water during transplanting, will stop root maggots and wireworms—insure a good stand.

Where to get aldrin

Aldrin is available from your local insecticide dealer under various well-known brand names.

It comes as liquid, wettable powder, granules, and in fertilizer mixes. Look for the name aldrin on the label or in the ingredient statement.

Shell Chemical Company, Agricultural Chemicals Division, 2299 Vauxhall Road, Union, New Jersey.

Control foliage pests with endrin

Endrin gives effective, long-lasting control of hornworms, budworms, fleabeetles, grasshoppers, cutworms, and many other foliage pests. For best results, check local application recommendations.
