Complete automatic feeding for DAIRY COWS and CATTLE!

VanDale SILO UNLOADERS

Double augers deliver more silage per minute even when silage is deeply frozen . . . and at a lower operating cost. Patented V-paddle impellers throw not blow . . . silage down chute. Adjustable drive hubs give positive traction in all types of silage. Three-point suspension keeps unloader level at all times.

Plus a complete line
of bunk feeders to meet your exact needs

Straight-out Auger Feeder

With VanDale units you can custom build the bunk feeding set-up to fit your needs. Drive section includes hopper, drive assembly and 10', high capacity 9" auger. Additional auger sections are in 10' units and are easily coupled.

Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder. High capacity 9' auger rotates within tube. Gives all weather protection, even feed distribution, and lower operating cost.

Conveyor Trough

An important link in automatic feeding. Positioned below silo chute, the VanDale conveyor trough carries the silage to the bunk feeder. Primary section includes hopper, drive assembly, and 10', 9' auger. Additional 10' auger sections may be added.

See us for modern automatic feeding equipment

Ag. Department Questionnaires

HARRISBURG — State Secretary of Agriculture William L. Henning today urged livestock and poultry producers to complete and return inventory questionnaires promptly to rural mail carriers.

The survey is conducted twice annually to determine

the number of animals on hand, as well as data on egg, milk and wool production in the Commonwealth. Some 13,000 farmers will receive the forms through the cooperation of the Post Office Department and rural mail carriers.

"We are aiming for a return saddle of June 1" the Secretary said. "The larger the response, the more accurate and reliable are the estimates for the coming year."

Survey results provide basic information for livestock, poultry and wool reports used by producers and marketing men in gauging their year's activities.
