

● 4-H Leaders

(Continued from Page 1)
the grounds, giving the barbecue a "country fair" atmosphere. In addition, many of the local clubs will be donating help and materials for the preparation and serving of the meal.

Lefever named committee chairmen this week and announced that tickets are available from any adult 4-H club leader.

Chairman of the ticket committee is J. Everett Kreider, Quarryville R1. Other committee chairmen are as follows: publicity, Mrs. Herbert Royer, 2025 Oregon Pike, Lancaster, and Victor Plastow, associate county agent; parking, Elmer Boyd, Ephrata R1, grounds and clean-up, Edgar Porter, Washington Boro R1; tables and chairs, Mylin-Good Manheim R1, table service, Mrs. Earl Kreider, Quarryville, serving line, Mrs. Eva Snader, Ephrata R1, and Mrs. Mark Hosler, Manheim R3, take-outs Gilbert Antes, Mount Joy R2, coffee, M. and Mrs. Melvin Long Lititz R2, concessions, Mrs. Charles Wood, of Nottingham R2, and Mrs. Harold Fry, Stevens R1, and the purchasing committee, Miss Joyce Kreider, Quarryville R1, Mrs. Clayton Sangrey, Lititz R2, and Mrs. W. Dean Fyock, Lititz R1.

All proceeds from the barbecue will go to the county 4-H club treasury.

PONY EXPRESS STILL CARRIES THE MAIL at this Ephrata R1 address. A regulation mail box has been fitted out with horse head — complete with bridle and reins — and a tail which opens the box when it is pulled. Only question we have is this; Does the mail carrier get a kick out of the unusual box?

Consumers are using as much fat now—45 pounds per person—as in the 1920's.

Only Major Improvement In
Chlorination In 50 Years

● Automatically Prepares Chlorine Solution

● Can Be Installed With Any Hypochlorinator

CHLORINATION—The most widely used and generally accepted method of purifying city water supplies is known as chlorination and the material used is chlorine gas. For rural water systems, the typical chlorinator is a small mechanical unit which injects measured amounts of a chlorinating solution into the pipe line whenever the water pump is operating.

**COWS PROPERLY CONDITIONED
... during the dry period PRODUCE
UP TO 25% MORE MILK!**

BEFORE CALVING This cow was fitted on the Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.

AFTER COMPLETING RECORD The same cow after having produced 23,044 lbs. of milk and 941 lbs. of fat as a 4 year old. Note the extreme dairyness and exceptional body condition shown after this cow produced 11½ tons of milk!

**600 pounds of
PIONEER
DRY and FRESHENING
yields an extra
TON OF MILK!**

Proper feeding of the dry cow is the most important single factor affecting herd health, longevity, and a sustained high level of milk production. In 60 days, while the cow is dry, Pioneer Dry and Freshening feed will repair the body from the previous lactation, build a reserve of body condition for the next lactation, and develop a stronger calf. In addition your cows will have less calving difficulties, eliminate placenta quickly, have less udder congestion, and most importantly they will produce up to 25% more milk!

See us today for full particulars.
