

Concentrates

(continued from page 15)
trate and give it a stir. Serve at once with colorful straws and longhandled spoons.

Kids of all ages will go for this ice cream treat. Roll scoops of ice cream in shortbread cookie crumbs. Put each in a paper cup or dish and top with a spoonful or two of partially thawed frozen concentrate fruit punch. Keep a batch in the freezer—they're handy snacks.

These saucy sundaes are specials. Spoon a tablespoon of two of partially thawed frozen concentrate for fruit punch over ice cream. Try: (1) Grape-Lemon frozen punch concentrate on vanilla ice cream; top with whipped cream and a sprinkling of cinnamon, (2) Chocolate ice cream with Pineapple-Lemon frozen punch concentrate topped with aminted green cherry or (3) Lemon Custard ice cream topped with punchconcentrate topped with Raspberry-Lemon frozen punch concentrate and slivered almonds.

Dress up creamy baked rice custard or tapioca cream by topping each serving with a spoonful or two of partially thawed concentrate for Grape-Lemon punch.

FREEZE FRUIT FILLING
FOR LATER USE IN PIES**

You'll save time now, yet

have apple pies ready for winter use if you freeze just the pie filling. You won't need to tie up your supply of pie tins either.

While pie apples are plentiful make up your favorite fillings. Slice the apples into a pie tin, add the sugar, flour, cinnamon, butter and lemon juice you would usually use. Place a piece of foil or transparent freezer wrap over the filling and freeze until the filling is hard.

Remove the filling from the tin and wrap in heavy duty freezer foil or other freezer wrap. You may wish to place the foil in the tin before filling.

Wrap with a drug store wrap to get all the air out from the pie filling. Mark with the date and kind of filling and store in your freezer.

To bake the pie, just place a bottom crust in a tin of the same size as your filling. Cover filling with a top crust that has vent holes and bake. You may want to bake your pie with only a top crust. It won't serve as nicely but crust means less calories.

You can freeze pies in other ways, too. Make them up and freeze them unbaked, completely bake them or partially bake them so you can brown them and serve them. To partially bake, get them to a light brown color and then refrigerate to cool quickly.

**PURINA
COW CHOW D
helps you get**

UP TO A TON MORE MILK PER COW

Purina Cow Chow D was developed by the cows in the Purina Research Farm dairy herd. It took years of painstaking research to develop Cow Chow D, the ration that has the milk-making power to help cows give up to 2,000 lbs. more milk per

year. If you're not feeding Purina Cow Chow D to your dairy cows now, come see us. We'll be happy to tell you more about it. Try Purina Cow Chow D — prove to yourself that Purina feeding costs you less.

Do You Know . . .

The Ingredient Tag Doesn't Tell All?

Here's a good example of why feed shouldn't be bought on the basis of ingredient tags alone.

Three groups of hogs were fed rations carrying identical ingredient tags at the Purina Research Farm. One was a Purina ration . . . the other two were called X and Y. The three groups of hogs were fed to 165 days.

The Purina ration made a net profit of \$12.71 per hog more than Ration Y and \$6.46 more than Ration X. Though ingredient tags are important, here's positive proof they don't tell the profit story!

**KNOCK OUT FLIES FAST!
Use Purina Dairy Spray**

If annoying house flies and biting flies are irritating your cows, help get rid of them with Purina Dairy Spray. Dairy Spray protects your herd from these pests . . . helps cows produce all the milk that's in 'em.

Dairy Spray is safe to use in your barn, milkhouse, and feed room. It's made with a biting fly repellent, MGK 11, plus pyrethrin, lethane, and "Crag" fly repellent.

For complete fly control around your dairy farm, use Purina Dairy Spray and other Purina Fly Killers. They come in a variety of economical sizes at our Checkerboard Store.
