**NOW'S THE TIME TO—**  
Stop weeds and soil pests in tobacco plant beds

Save work and expense next spring. Treat your plant beds with VAPAM\* soil fumigant now. It's easy to use, does not require special equipment.

**Stauffer Chemical Company**

**1 to 3**

Any way you look at it, it pays to use agricultural limestone because experiment stations have found that at least three dollars are returned in increased crops for every dollar's worth of limestone applied. Sometimes the returns go up, they found to one to fifteen.

**SORRY ABOUT THE PICTURE BUT The Record Speaks For Itself**

A few weeks ago we gave you the record and picture of John Kohr. His broilers were out at 9 weeks, 2 days, 3.81 - 2.04 — 100% marketed

Now Alvin Keiter shows us that **Good Chicks Good Management and Early Bird Feeds**

make a **WINNING - Low Cost Combination**

The record of his latest flock:

Age 8 weeks, 5 days — Weight 3.64 lbs.  
Lbs. of Feed per Lb. Liveweight 1.92 — Liveability 99%  
U.S.D.A. Condemnation 37 lbs.

This is exceptionally good, but it shows what can be done when you combine all of the elements necessary for success — Good Chicks - Good Management - Early Bird Feeds. In 8 successive prior flocks of 8,000 Alvin had feed conversions that ranged from a high of 2.27 to a low of 2.14.

On August 13th we started delivery of our New Improved Broiler Rations designed to further lower your costs with better performance. **MAY WE SERVE YOU?**
