down on 14 tons of manure and a clover timothy-sod Two hundred fifty pounds of 5-10-10 was added at planting, and 50 pounds of 35 per cent Nitrogen was side dressed during the two cultivations

No chemical weed control was used. He harvested 144.3 bushels per acre.

Runner up in the competition was David Alan Funk, the 11 year old son of Mr. and Mrs. Benjamin Milton Funk, Washington Boro R1, in his first year of 4-H club

work. His yield in very dry conditions was 90.2 bushels.

Paul scored 9% out of a possible 100 points to take top project book honors. Funk's 94 was second, followed by the 92.6 points of Annette Long, Lititz R3. Donald Trimble was in fourth place with 92.4, and Jerry Snader, Ephrata R1 placed fifth with 91.6.

In project exhibits, Gary Porter Washington Boro R1, placed fourth, and Annette Long was fifth. Sixth to tenth

places respectively, went to Washington Boro R1. Jerry Snader, Larry Groff, Judge Glenn Miller, Lititz R2; Jeff. Witman, on County Agent, said the Mount Joy R2; Aldis Martin, habits, while not large Drumore, and Gerald Hess size, showed excellent qu

**COWS PROPERLY CONDITIONED
... during the dry period PRODUCE
UP TO 25% MORE MILK!**

BEFORE CALVING This cow was fitted on the Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.

AFTER COMPLETING RECORD The same cow after having produced 23,044 lbs. of milk and 941 lbs. of fat as a 4 year old. Note the extreme dairyness and exceptional body condition shown after this cow produced 11 1/2 tons of milk!

600 pounds of PIONEER DRY and FRESHENING yields an extra TON OF MILK!

Proper feeding of the dry cow is the most important single factor affecting herd health, longevity, and sustained high level of milk production. In 60 days, while the cow is dry Pioneer Dry and Freshening feed will repair the body from the previous lactation, build a reserve of body condition for the next lactation, and develop a stronger calf. In addition your cows will have less calving difficulties, eliminate placenta quickly, have less udder congestion, and most importantly they will produce up to 25% more milk!

See us today for full particulars.
