Get up to  
a **TON**  
more milk  
per  
cow...

with **PURINA COW CHOW D**

America's dairy cows are producing more milk than ever before. And a Purina milking ration, Cow Chow D, is helping many of them make up to a ton more.

Balance of quality ingredients is the secret behind the high efficiency of Purina Cow Chow D.

Purina's Research herd of Holsteins and Guernseys has been giving nutritionists factual information on Purina

Dairy Rations for over 30 years. This milking string proved the value of Cow Chow D by producing an average of 2067 pounds more milk per cow over that produced on a regular 16% milking ration.

Put Purina Research to work on your farm by feeding Cow Chow D. Chances are, like other Northeastern dairymen, you'll find this ration will help your cows make more milk . . . and more profit.

## Do You Know . . . Sows Produce 100 Gallons Of Milk Each Year

A brood sow is a factory — a "pig factory" — and she needs help to produce to capacity.

At the Purina Research Farm on the Purina Hog Program, sows each year produce more than 100 gallons of milk; wean 18 pigs; and maintain their own bodies. These are mighty big jobs.

Purina Sow Chow — fed with your grain — is designed and researched especially for these big jobs. Get Sow Chow at our store with the Checkerboard Sign.

## CUT CRD IN DAY-OLD CHICKS

Now . . . you can help knock out costly CRD infection in day-old chicks with Purina Tylan Soluble. Tylan Soluble contains tylosin, a new, fast-acting antibiotic that cuts down the most common cause of CRD in baby chicks.

When your chicks first arrive, add this powerful Health Aid to their drinking water. We can supply you with Purina Tylan Soluble in economical 100-gram or 2-gram packets.

Knock out CRD with new Purina Tylan Soluble in chick drinking water.
