

CHECKERBOARD

service bulletin

INCREASE YOUR INCOME with

Mr. Poultryman, are you getting ready for profitable commercial operation in the years ahead?

As you know, some farmers are expanding flocks for more income; streamlining equipment and housing for peak of performance.

If you are thinking along these lines, ask us about the Purina high density plan. It's a plan worked out by Purina engineers, Purina Research

Farm specialists, and by field experience. It answers questions you will want to know about bird density, housing, insulation, controlled environment, egg handling. Drop by our store today, and prove to yourself . . . Purina service helps you increase your income.

Science is working hard in Purina's modern laboratories

Science is working hard for you at Purina's modern, new laboratories, Checkerboard Square, St. Louis. Each month, some 25,000 quality-control tests are run on hundreds of ingredients and chemicals used in today's complex feed formulas. Exact and time-consuming, yes . . . but such work by Purina's dedicated team of scientists is one of the underlying reasons why Purina has led the way in better feeding methods for 68 years.

Purina doesn't believe in experimenting with you, the customer. That's why its laboratory facilities were recently doubled in size . . . to better assure you of top-quality ingredients and precision-formulated Chows worthy of the Checkerboard trademark. This modern laboratory is evidence, too, of Purina's desire to keep abreast of the very latest in animal nutrition . . . to help you produce more meat, milk, eggs and wool more efficiently.

GET RID OF LICE ON YOUR HOGS

Now you can go after lice and fleas, help prevent the spread of sarcoptic mange anytime with Purina Hog and Cattle Dusting Powder. There's no need to worry about spraying your hogs in cold weather. Just rub Hog and Cattle Dusting Powder into the hair coat of each hog and scatter it in the bedding.

We've got Hog and Cattle Dusting Powder in sturdy, 20-lb. fiber pails at our Checkerboard Store. Pick one up now. And be sure to ask us for your free G-4 Insecticide poster that comes with each pail you buy!

To stop lice and fleas, dust your hogs with Purina Hog and Cattle Dusting Powder. It's finely ground — gets down next to the skin where it does the most good.

For The Farm Wife

(Continued from Page 16)
from 350 to 425 degrees. The higher temperatures produce a browner, crisper crust and the baking time is slightly shorter. Baking time depends partly on size of loaves.

A test of doneness of bread is to tap the loaf with the knuckles. If baked through, it sounds hollow, the loaf is also well browned and shrinks slightly from sides of pan. When the bread is baked, remove from the pan immediately to prevent a soggy crust.

STORAGE

Cool breads thoroughly before placing in bread box. Breads also store well in plastic bags or aluminum foil. Bread should not be stored in the refrigerator unless you are having a problem with mold. Research has shown that refrigerator storage hastens staling. Bread may be kept for several months in perfect condition in your freezer, wrapped in moisture-vapor-proof material.

FREEZING

Yeast breads and quick breads can be frozen. Length of storage should not be more than three months. We recommend freezing the baked pro-

duct. Unbaked dough may lose some of its rising capacity while frozen, the bread when baked would be coarse in texture and smaller in volume.

A real convenience is to slice the cooled bread. Then wrap and freeze. The slices can be toasted without thawing. For sandwiches, butter and spread the frozen slices or bread. The frozen slices help to "refrigerate" a lunch box.

We could not give you these suggestions for making home-baked breads and rolls without sharing some recipes with you. Watch for this column next week when we will have some yeast recipes that we're sure you'll want to try.

HAY BRINGS \$53.50 AT JOHN HERR SALE

Hay sold up to \$53.50 per ton at the John G. Herr sale last Saturday.

At the fair on Rt. 72 about 14 miles south of Lancaster, straw sold up to \$38 per ton. Corn brought \$42.50 a ton.

Seventeen heifers, 10 of them springing, averaged \$252.50 per head and eight holstein steers weighing about 600 to 800 pounds brought \$197.00 per head.

Driller and Kieder were the auctioneers.
