

Co. ASCS Office Cooperates On Many Approved Practices

Fred Seldomridge, County Chairman
A total of 548 farmers were enrolled and completed practices under the 1962 Agricultural Conservation Program. Practices were completed and cost-share paid as follows:

| Practice | No. of Farms | Units | Amount |
|---|--------------|-------------|-------------|
| Liming grassland | 411 | 7036 acres | \$36,599.01 |
| Establishing permanent cover | 140 | 1438 acres | 16,904.78 |
| Improving Established cover | 110 | 2019 acres | 18,206.89 |
| Establishing permanent cover to protect diversion terraces, ditch banks, etc. | 2 | 1 1/4 acres | 51.52 |
| Establishing winter cover crops | 205 | 3497 acres | 5,107.39 |
| Contour stripcropping and Hedgerow removal | 62 | 1162 acres | 6,923.59 |
| Field Stripcropping | 1 | 15 acres | 30.00 |
| Clearing & leveling pastureland | 9 | 76 acres | 1,006.60 |
| Developing Springs | 2 | 2 | 173.71 |
| Constructing Farm Ponds | 2 | 2 | 595.20 |
| Establishing Sod Waterway | 5 | 3265 feet | 492.00 |
| Constructing Terrace | 1 | 2433 feet | 135.00 |
| Constructing Diversion Terrace | 5 | 2780 feet | 601.04 |
| Constructing Open Drainage Systems | 1 | 500 feet | 84.75 |
| Installing Tile Underdrain | 14 | 17,073 feet | 2,620.44 |
| Planting Forest Trees | 1 | 10 acres | 200.00 |

PICK FROM THE
BIG FAMILY**

P-A-G HYBRIDS

As your P-A-G dealer, I will gladly show you how P-A-G's big family approach gives you a wider choice of hybrids... lets you build a team of hybrids that can boost your total income from corn. I'll also explain how a P-A-G corn program works to boost all-around efficiency, no matter if you grow corn for cash or for livestock.

P-A-G ALFALFA

I've got all the information you need on P-A-G's famous FD-100, Ranger, Vernal, Buffalo and California Common, and I'll be glad to help you pick the ones that best fit your requirements. Sow these seeds with assurance. They have been tested and approved by P-A-G.

Improving Stand of Trees 1 2 acres 5.32
\$89,737.24

PRICE SUPPORT PAYMENTS

WHEAT — 61 farmers stored 39,912 bushel and received \$82,053 through warehouse loans 3 farmers stored 1,064 bushel and received \$2307 through farm-stored loans.

CORN — 2 farmers stored 4,771 bushel and received \$6,393.

CONSERVATION RESERVE PROGRAM

There are 49 Conservation Reserve contracts in effect, covering 1894 acres, for which farmers received payments totaling \$38,323.

WOOL INCENTIVE PAYMENTS

Payments were made as follows for wool and unshorn lambs sold during the 1961 marketing year:

133 producers received \$5,311.83 for shorn wool.

58 producers received \$832.17 for unshorn lambs.

WHEAT ALLOTMENTS AND MARKETING QUOTAS

6146 Wheat allotments were established in 1962, and wheat cards were issued to all eligible producers. 60 farmers applied for Feed Wheat Exemption.

1962 FEED GRAIN PROGRAM

CORN — 417 producers diverted 5187 acres and received \$253,531.

BARLEY — 27 producers diverted 229 acres and received \$5,333.

WHEAT STABILIZATION PROGRAM

227 producers diverted 1137 acres and received \$45,645.

DISASTER PROGRAMS — APPROVED BECAUSE OF DROUGHT

10 farmers recovered permission to harvest hay or pasture acreage diverted under Wheat Stabilization, Feed Grain or Conservation Reserve Programs.

50 certificates were issued to farmers or dealers for 25% freight reduction on hay shipped into county.

As of December 31, 1962, 27 farmers had received approval to purchase corn under the Emergency Livestock Feed Program, at 75% of support price. This program is to help farmers preserve and maintain foundation herds of eligible livestock.

March 2, 1963—9

Forester Makes Annual Report

The Foresters of the Valley Forge Forest District have experienced an active year in all phases of forestry except tree planting. The greatest increase in work was with the 28 fires which burned an area of 217 acres. The cost of extinguishing these fires totalled \$2,607.00. Many of the fires were caused by carelessness of people burning leaves and brush.

Between the time of fighting fires and reporting them, we serviced 42 requests from the people of the county. Two hundred and sixty-nine thousand board feet of timber were marked with a value of approximately \$6,000.00 returned to the farmers. Many acres are still being cut each year without any thought of the future. There were only 7,000 trees shipped to Lancaster County from the State Nurseries which produces nearly 20 million trees per year.

Other projects worked on during the year were: Plantation improvement; Management information to farmers and Educational programs including Career conferences. The improvement of woodland to produce better timber is our most important project but is not carried out by many people. Only three this past year. With the increased value of land in our county, the farmer will need to make his woodland pay by raising better trees.

The District Forester, Mr. W. P. Moll, has offices in Port Kennedy, Montgomery County and John H. Kitch, your Service Forester, R. D. 1, Reinholds, Lancaster County are both ready to help you in any woodland problems and encourage everyone to PREVENT FOREST FIRES!

Highway Dept. Sprays, Plants On Roadbanks

The following are the accomplishments of the Highways Department in cooperation with the Lancaster County Soil Conservation District.

Contract Seeding and Mulching: A total of 74,922 square yards (15.48 acres) of seeding and mulching cut and fill slopes was done by contract along 3.97 miles of new road construction. The routes involved were L. R. 36008-5, 36091-1, 36010-1, 36067-2 and 36013-6.

Revitalization: The grass on cut and fill slopes as well as on median and interchange islands was revitalized along L. R. A-83, 128, 129, 280, 407 and 36006 in the vicinity of Lancaster, Marietta and Columbia. Materials used included 4.2 tons of 8-16-16 fertilizer, 350 lbs of grass seed and 42 lbs of Crown Vetch seed.

Chemical Spraying: A total of 286 gallons of Herbicide (2, 4-D & 2,4,5-T) and 585 lbs. of Karmex (Soil Sterilant) was applied along 347 miles of State Highways. Vegetation sprayed with a 1,000 gallon rig included brush, poison ivy and noxious weeds. The herbicide was applied at the rate of one gallon to 100 gallons of water, and the soil sterilant was used at the rate of 10 lbs. to 100 gallons of water.

A grand total of 2,000,000 linear feet of Roadside treatment of all types was accomplished during 1962 in Lancaster County. It is anticipated that this amount will increase to about 2,100,000 linear feet in 1963.

H. P. Kaufman is County Roadside Engineer.
