

## BEST FOOD BUYS Weather Does Not Hike Price

In spite of heavy rains and threatened rail strikes, food supplies remain adequate at generally unchanged price levels. Abundant supplies of red meats and an increase in volume of imported fruits has added to the variety of food commodities offered at local food markets, observes Tom Piper, Penn State Extension Marketing Agent.

Increase receipts of cattle, hogs and lamb at major terminals during the past week will encourage feature pricing. Selected cuts of beef, including roasts and steaks, will be candidates for promotion. Pork loin costs have declined to lead the list of lower costing pork cuts. Turkey and fryers hold at unchanged costs but may be included in the long-range merchandising plans of some retailers.

For those looking to vary a Lenten diet, as well as for all other fish and seafood lovers, there'll be a good selection of sea bass, shad, whiting, halibut, oysters, crab meat and scallops. Eggs and dairy products are in plentiful supply, economically priced, and as versatile in the menu as the cook's imagination can contrive.

Heavy rains have hampered harvesting operations in Florida and impaired quality of some commodities. Best values are in potatoes, lettuce, radishes, carrots, celery, endive, escarole, onions and sweet potatoes. New fields of cucumbers, peppers, eggplant, tomatoes and asparagus now ready for harvesting will boost the supplies of these items in the weeks ahead.

Demand for apples has improved with the opening of controlled atmosphere storages. Bananas, avocados, pears, strawberries and citrus fruit are available at firm price lev-

els. Imported fruits are now available in volume, with the Chilean fruit season in full swing. Some peaches have arrived from South Africa and a cargo of Argentine pears has been shipped.

### ● Have You Heard? (Continued from Page 15)

Analyze the job. Are there steps that seem unnecessary? Can you save work if you use both hands? Would a different storage area make it easier to get at certain equipment? On any job that you repeat often, it pays to take a critical look at how you work. And when you begin to study the jobs you dislike and work toward changes that will save time and effort, the jobs may

turn into ones you enjoy.

#### Helpful Hints

To remove surface soil from plastic dinnerware, rub with baking soda sprinkled on a damp cloth. Soda removes the soil with a gentle action that won't take off the finish or scratch the surface.

Cook chopped onion and sliced almonds until lightly browned in butter or margarine. Heat with canned green beans and corn for a delightful succotash.

To add zest and color to

roast turkey or roast pork, fill canned peach halves with mincemeat, dot with butter or margarine, and bake about ten minutes or until heated.

#### This an' That

Sixty percent of our public recreation areas are located in the west where only 15 percent of the people live.

During 1962 more than four and three-quarter billion pounds of food were distributed to needy persons at home and overseas through the U.S. Department of Agriculture's direct distribution program.

### Get the BIG silo unloader value!

## VanDale

Delivers more silage faster!

Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.

Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.

#### DELIVERS BETTER SILAGE TOO!

The double augers, operating in conjunction with the patented V-paddle impellers, dig the silage, mixes it thoroughly, and then throws it down the chute. Your cows and cattle get good, palatable silage... not a powdered mash as so often happens with unloaders using blowers.

TWO SIZES:  
Standard—for silos 10' to 15'  
Heavy Duty—for silos 15' to 30'
