wall. While he makes out the daily weight slip — one copy goes to the dairy and one copy stays in the milk house — the tank empties and is ready to be rinsed. The hauler does not wash the tank; he rinses it with a hose to keep the milk from drying on the inside, but the farmer must wash the tank.

On the day I rode with him, Harnish made five stops to pick up 127 cans of Guernsey milk. After he delivered this to the dairy plant, he made six more stops to pick up 183 cans of milk from other farms. The dairy still speaks in terms of cans since the gages on their storage tanks were built before bulk handling was adopted.

The "galloping" motion of the truck intrigued me. After I had tried unsuccessfully to figure out what caused it, Harnish told me it would be worse after the next stop. The shifting of the milk in the big

differences of opinion until now "One farm organization chose not to participate in drafting the legislation, and in fact have done everything they can to bring about its defeat."

He emphasized that the program is a one year program and would be subject to a referendum next year if it carries this year. "This has nothing to do with 1965. You are going to have another program and another referendum."

The meeting was sponsored by the citizens wheat committee headed by Edison Osborne, Peach Bottom.
