 ficate quota, so that in a normal yield year all wheat produced on the reduced acreage would be certificate wheat.

3. Substitution of wheat for feed grains on feed grain allotment with these results.

(a) If the 1964 Feed Grain Bill now before Congress is enacted, he will be eligible for price support at the non-certificate level (\$1.30 per bu. nat'l average) or

(b) If the 1964 Feed Grain Bill does not pass, he may still plant his feed grain allotment to wheat, but for storage only.

4. Excess Acres Grower may plant excess wheat on any land

other than his conserving base and either destroy later or harvest for storage only.

5. Certificate Redemption. In years of low yield or total crop failure, wheat stored from previous years may be used to fill the grower's certificate quota. In case he has no wheat, certificates may be redeemed for cash at about 70c each.

6. Seed Wheat. If the grower elects to sell a part of his certificate quota for seed, the unused certificates may be redeemed for cash. The same is true for any of his certificate wheat that he uses himself for feed or seed.

7. No Bushel Limitation on Non-certificate Wheat. All

wheat produced on a minimum of 10 acres, and above the certificate quota for the farm, may be fed, stored, sold on the open market, or placed under government loan. Protein and sedimentation premiums will apply on all wheat whether sold or placed in the loan and on both certificate and non certificate wheat.

Respectfully,
 Kenneth McCauley, Sec.
 Farmers For Wheat Bill Passage

Soil Stewardship

(Continued from Page 1)
 tricts and the nation's 2,960 similar units are participating for the tenth year in the observance.

A national committee of representatives of the National Lutheran Council, National Catholic Rural Life Conference, Board of Missions of the Christ and the Southern Baptist Convention planned this year's program.

Funk encouraged all residents of the county to take action to conserve, protect and improve land, water, forest and

Governor William W. Scranton signing proclamation designating May 19 to 26, 1963 as "Soil Stewardship Week." Looking on are (left to right) Edwin M. Green, Jr., President of Penna. Council of Churches, Grant R. Pecht, Chr. of Soil Stewardship Committee, Penna. Association of Soil Conservation District Directors and Leland H. Bull, Chairman of State Soil Conservation Commission and Secretary of Agriculture.

ATTENTION

Farmers and Poultrymen

MORE

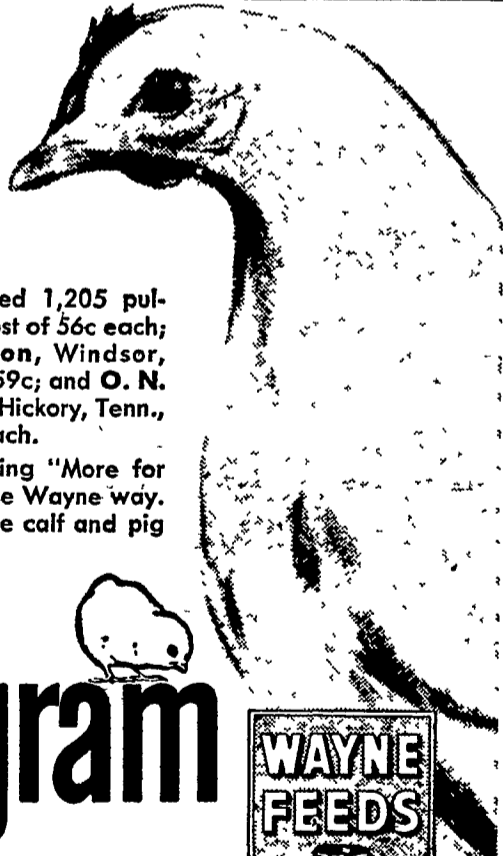

FOR YOUR MONEY!

Here's why: The Wayne Pullet program develops chicks into vigorous pullets with strong frames, ready to lay at the proper time. You get higher production, more large and extra-large eggs, less prolapse and improved livability. Feed costs are low too, like those of Mrs. Robert Miller, Wabash,

Ind., who housed 1,205 pullets at a feed cost of 56c each; or G. G. Wilson, Windsor, Ky., 1,025 for 59c; and O. N. McClung, Old Hickory, Tenn., 700 for 74c each.

Begin now getting "More for Your Money" the Wayne way. We have Wayne calf and pig programs too!
