

TISSUE TESTING IN THE CORN FIELD is one of the newer practices taught in the vocational agriculture department at Penn Manor High School. Richard Hackenberger, far left, teacher of vocational agriculture, squeezes juice out of the corn stalk onto a test paper held by Harold Herr, state FFA treasurer. Second from right, Garland Gingerich, teacher of vocational agriculture, holds the reagent bottle, while Mr. Aaron Herr, Harold's father looks on. The test gives an indication if the plant is suffering from a plant food deficiency.

● FFA Treasurer

(Continued From Page 8)
1961. He was chapter secretary in 1961-62, and chapter vice president in 1962-63.

Harold was chapter star farmer, won the DeKalb award for excellence in agriculture, the National FFA foundation for poultry, the county bankers award, and the outstanding agriculture senior award from Manor View Dairy during his senior year. As a junior he won the FFA foundation medals for public speaking, poultry, and soil and wa-

ter management. He was a contestant in the area public speaking contest, holds the Red Rose degree and the Keystone Farmer degree in FFA, and was a contestant in the state land judging contest at Penn State last year.

Garland Gingerich gives much of the credit for Harold's success to the cooperation and encouragement of his parents. Harold is an easy boy to work with, he said. He was in an excellent class, but he was the outstanding all-around worker in the group.

This year, for the first time, graduated seniors in the Manor chapter will take an overnight trip. Harold deserves much of the credit for this trip, Gingerich said. He organized the chapter's group projects in corn and tobacco which will finance the week-long trip to Wildwood, N.J. later this summer. "I think this has given the chapter something it never had before," Gingerich said.

In recommending Harold for the state office, Gingerich wrote, "He exhibits the high-

est standards of conduct, neatness, cooperativeness, and dependability."

As any teacher can tell you, this is quite a combination in any student.

**Now...
two sizes**

*John Deere
Rotary Choppers*

Yes, sir, John Deere Rotary Choppers now come in two sizes. There's the 5-foot 15-A for average-acreage growers . . . and the 6-foot 16-A for large-acreage growers.

The rugged 15-A and 16-A are just the ticket for mechanical pasturing, chopping standing hay for silage, shredding brush and stalks, clipping pastures and handling many other jobs around the farm.

See us soon for full details.

DON'T LET FLIES LOWER MILK PRODUCTION

Flies bother cows, lower milk production. Stop 'em with a combination of Purina Fly Killers.

Place Purina Fly Bait and Purina Fly Checkers where flies gather, but out of reach of cows. Spray Purina Dairy Spray on cows at milking time. Kills, repels hornflies, stable flies! Use Purina Dairy Oiler Insecticide in backscratches—cows protect themselves! Use Purina Spray & Dip or Purina Malathion Spray inside barns, milking parlors for long-lasting protection. See us for Purina Fly Killers that kill flies like magic.
