The New Look

STEER SUPPLEMENTS

Benefit by the results of latest research and feed a MODERN CATTLE SUPPLEMENT

The economy of non-protein Nitrogen, Stilbestrol, vitamin A, minerals and other nutrients in balancing roughages and corn for fattening cattle is universally recognized.

VITAMIN A

Cattle make relatively poor use of vitamin A from plants. Maximum results require vitamin A from other GREEN PASTURES STEER CONCEN-TRATES are seasonally formulated to supply adequate quantities of vitamin A all year with greater quantities in hot weather when beef cattle requirements are highest.

TRACE MINERALS

must be furnished for the proper functioning of the rumen.

COBALT is required by cattle to make vitamin B12. **SULFUR** is necessary to properly utilize UREA. ZINC has recently been demonstrated to improve

Gain

Feed Efficiency and Bloom

GREEN PASTURES Steer Concentrates No. 29 and No. 30 are MODERN CATTLE SUPPLEMENTS

Both contain, in addition to other proteins, Urea, an economical source of protein, and molasses as a source of quick energy.

Also, vitamins and minerals in ample quantities to insure maximum utilization of this source of protein.

They are Complete Cattlé Concentrates

When fed as recommended they adequately supplement roughage and grains to provide maximum daily gains and utilization of feed.

For a steer feeding program which will give you the best possible gains and quality in the most economical way, see any MILLER & BUSHONG Service Representative or call us at Lancaster 392-2145 (Area Code 717).
