Combine your corn and save

John Deere 45 Combine

Equip a Hi-Lo 45 Self-Propelled with a 210 Corn Attachment and watch profits climb, as you spread your equipment investment over more acres, more crops. Handle up to 12 feet of grain, 3 rows of soybeans, 2 rows of corn. You save the cost of a picker-sheller . . . keep your tractor free for other fall jobs. Save further—save more down corn, reduce ear droppage, cut shelling losses. Stop in. Look over a big-capacity 45 today. We're ready to trade.

USDA Changes Rules On Farm Pesticides

The U. S. Department of Agriculture moved this week to tighten Federal regulations governing the labeling and registration of pesticides to provide greater protection to consumers and the general public.

Proposed major revisions of present regulations, published in the Federal Register, will aid users in handling pesticide chemicals safely and effectively and will provide additional safeguards against misuse. Individuals or organizations wishing to comment on the proposals are invited to do so within the next 60 days.

Today's action by USDA's Agricultural Research Service takes account of the rapid increase in use of pesticides by

Lancaster Farming, Saturday, September 21, 1963—17

consumers in and around the home. Most householders, ARS officials believe, need additional precautionary information to help them use and store pesticides safely.

The revised regulations would require key warning and caution statements to be placed on the front panel of the pesticide label, along with the words "Keep Out of Reach of Children." These warning and caution statements must be easy to read, and certain key words must conform to specified type sizes.

The proposed revisions would eliminate from the labels of all economic poisons such claims as SAFE, NON-POLYSONOUS, NON-TOXIC, NON-INJURIOUS, and HARMLESS, with or without the qualifying phrase "when used as directed," and would declare a product bearing these claims to be misbranded.

The revised regulations would define new testing procedures to be used in determining the toxicity of pesticides. They would provide for refusal of registration of a pesticide if adequate directions and warnings cannot be written for the pesticide which will prevent injury to the general public. The proposed revisions also provide new restrictions in the handling of experimental compounds.

Before developing these proposals, USDA officials met with outside experts to gain the benefit of their views. This group included representatives of the American Home Economics Association and Federal and State agencies concerned with safe and effective use of pesticide materials.

Farm Prices Show Increase

HARRISBURG — Prices received by commonwealth farmers in mid-August for dairy products rose 3 per cent over last month, but was 3 per cent below August a year ago, according to the Pennsylvania Crop Reporting Service.

Wholesale milk, at \$4.45 per hundredweight, was 15 cents over last month, but down 15 cents per cwt. from August a year ago. Prices received for eggs increased 2 cents a dozen over last month, and turkeys increased 1 cent a pound.

Prices received for meat animals decreased from the month before. Hogs, down 20 cents, declined for the first time in several months. Slaughter cows were down 40 cents per cwt. for the third consecutive month. Lambs declined 50 cents as sheep prices decreased for the fifth consecutive month. Steers and heifers remained the same as last month.

EXCLUSIVE SPEEDY
ROOF RAFTERS MAKE
SPEEDY CORN CRIBS

Twice as Fast as Twice as easy to erect

Speedy roof rafters guarantee easy, proper placement of roof panels the first time. Rafters add great strength to the roof. Panels need only to be bolted together in three places. It's another big time-saving feature you get only in Speedy Bar-Lok corn cribs.

Stands up best—lasts longer
Wire mesh panels are 5-gauge wire—thick as a 1/4" bolt! No

bulge or sag. Sturdy 26-gauge galvanized roof is securely anchored to 9 steel roof rafters and side panels. Can't blow off!

Come in today and see the Speedy Bar-Lok corn crib. Let us prove to you that Speedy is twice as fast—twice as easy to erect. Let us show you all the other features that make Speedy Bar-Lok your best corn crib buy.
