

Poultry Team Wins Second At Richmond

Pennsylvania's champion 4-H poultry judging team took second place in poultry judging at the Atlantic Rural Exposition Monday at Richmond, Virginia. The state team, Lancaster

County's contingent, scored a possible 2000 out of a possible 2400 points. Indiana's winning team had a total of 2123 points. Robert Henry, New Providence R1, with 719 points out of a possible 800, was third high individual judge in the contest, while his twin brother Albert was fourth with 706 points. Gary Porter, Washington Boro R1, the third team member, had 666 points, and

the team alternate, J. Kenneth Hess, Manheim R3, scored 643. Top individual judge in the contest had 723 points. The team, selected during state 4-H days at the Pennsylvania State University in August, will judge both poultry and eggs during the NEPPCO exposition on October 8 in Harrisburg. Third to sixth team placings at Richmond were Virginia,

Lancaster Farming, Saturday, September 28, 1963—5 Maryland, West Virginia, and South Carolina. The Pennsylvania 4-H livestock judging team, from York County, placed first in the contest. This team will judge at the Pennsylvania Livestock Exposition in Harrisburg, and in the national 4-H contest at the International Livestock Exposition in Chicago in November.

CAGE LAYER OPERATORS!

Good Management Makes Any Cage Feed Better Including Ours, Of Course

Here are the records of 3 flocks of cage layers for a 12 week period ending August 23rd.

The birds are different, but all are housed in older type cage facilities. Non-insulated, windows, no special ventilation.

FLOCK	# Birds start of period	Age at end of period (in weeks)	# of periods in production	% production hen day basis for the 3 periods	Lbs. feed per doz. 3 periods	Average mortality per period	% mortality for 3 periods
A	3580	61	10-1/4	70	3.38	0.836%	2.51
B	4041	49	7-1/4	66	3.40	1.23%	3.70
C	3528	38	4-1/2	79	3.18	0.6%	1.78

Note the difference in performance . . .

Quality of the pullets,
Management,
Housing,
All are important factors.

We get many records showing better performance, especially in the newer type of controlled environment housing.

FINEST SERVICE ANYWHERE!

Transfer Milk Efficiently From Cow to Bulk Cooler

The "Sputnick" MILK-PORTER is the cleanest, most efficient method for transferring milk from cow to bulk cooler.

- Manufactured from heavy gauge stainless steel.
- Lid seals tightly to keep milk germ free.
- Passes through openings 29" and over.
- Moves quiet and easily on rubber-tired, ball bearing wheels.
- Does away with long, expensive pipe lines, milk pumps and releaser.
- Two sizes.
- Low-cost sanitizing.
