

## Farm Women 10 Host Husbands

Farm Women 10 entertained husbands and guests at a banquet last Saturday evening at the Meadow Hills Dining Room. Sixty-six attended the event. Major and Mrs. William Fox showed pictures of Hawaii and talked about their experiences in that state. Special guests for the evening was Mrs. Kenneth Eshleman, president of the County Farm Women, and her husband. Mrs. Eshleman spoke briefly to the group. At a business meeting the society decided to make Thanksgiving table arrangements for the hospital at Embryville on

Oct. 17. They will meet at the home of Mrs. Frank P. Hodecker, 907 Roperstown Rd. On that occasion. On Oct. 26 the arrangements will be taken to Embryville. Anyone wishing to go along for the trip, which will include luncheon, should contact Mrs. Hodecker.

On Oct. 16 the group plans to sew at the General Hospital with Society 9. The group will also serve treats at the County Home during the month of October.

Christmas Seals will be folded at the Health and Welfare Center on Nov. 4.

Mrs. Harry Shuman talked to the society about the original organization of the Farm Women Society 10, 40 years ago. She is a charter member

of the group. Members are urged to bring something on the bazaar table at the Nov. 2 meeting of the county convention. Traffic accidents will not subside until motorists learn to make driving decisions correctly quickly and regularly. The average city driver must make as many as 2,000 decisions a day behind the wheel, proof enough of the need for constant driver attention and a willingness to adjust to conditions.

Loss of the thumb destroys one half of the hand's function, and loss of thumb and first finger almost completely destroys the usefulness of the hand.

SECOND GENERATION HEIFER in the Cloister FFA calf chain is exhibited by her new owner, Irvin Schnauer, Reinholds R1. Irvin will keep the heifer until she has a heifer calf which will be returned to the chapter. L. F. Photo

Lewis Ayers is the teacher of vocational agriculture and advisor of the FFA chapter at the school.

## New, Low Cost Artificial Dryer Can Solve Your Wet Corn Problem

Has a slow growing season, plus an early frost left you with wet corn? If this is your problem, now is the time to do something about it. Your County Agent is recommending artificial drying.

A Circle Steel drying and storage bin from Grove Manufacturing Company is not only one of the best, but lowest cost solution to this problem. Considerably less than other installations, a Circle Steel bin will give you the advantages of on the farm artificial drying at an initial cost of only \$3,000 to \$5,000, and can easily be financed over a long term.

They go up in just a couple of days; they're permanent, durable buildings. Circle Steel bins are bottled gas fired, so simple, they're almost foolproof. They have been proven in the midwest grain belt for wheat, soybeans, and shelled corn.

### THIS IS THE YEAR TO DO IT

A Circle Steel dryer can pay off fast with this year's wet corn. For example, using 1000 bushels of wet shelling (25%) corn as a basis, here's what happens when you dry to (15%) corn selling for \$1.20 per bushel.

1000 bushels of wet shelled (25%) corn would bring \$915.00 after 3¢ per point dockage.

Dried to 15% moisture, the original 1000 bushels shrunk to 882 bushels brought \$1,059.00.

\$1059.00 dry  
915.00 wet  
\$ 144.00 more for the 1000 bushels after drying

Call, visit or write one of these GROVE dealers, TODAY!

## GROVE MANUFACTURING COMPANY

Shady Grove, Pennsylvania

That's 14.4 cents per bushel more for dry corn!

With a Circle Steel Bin from Grove you can dry corn for a few cents a bushel. That's better than 10 cents a bushel profit.

### OTHER ADVANTAGES TOO

- drying and storing permits you to sell when the market price is at its highest
- allows harvesting at 26% to 28% moisture content, reducing ear drop and snap and roll shelling losses.
- prevents molding, rodent and other insect damage.

### COMMERCIAL COMPARED TO FARM DRYING AND STORAGE

With your own drying and storage facilities, you have a far more efficient operation. There's no longer any need to tie up a truck and driver for hours on end waiting his turn to unload at the elevators during peak harvest and selling days. Plus keeping better control of your moisture loss and actual weight, you save additional profits by drying your own crop.

### LAST MINUTE DEAL

As Grove Dealers for Circle Steel bins, we have a special wet corn program that will have you drying and storing your corn in as little as a week's time—with little effort on your part—at a cost that will surprise you.

## Growing HEIFERS and Dry COWS need

## Wayne FITTING RATION

Wayne Fitting Ration produces rugged, full-bodied heifers that are thrifty and ready to breed at an early age. Fitting Ration also helps the dry cow replace flesh lost during the previous lactation and puts her in top condition to start the new milking period at a high level of production.

Bred heifers and dry cows must receive a highly nutritious ration in order to build the unborn calf. Wayne Fitting Ration supplies the vitamins, minerals, proteins and energy needed to drop thrifty, strong-boned calves.

In a test at the Wayne Research Farm, well fitted Holsteins produced 1720 lbs. more milk and 83 lbs. more fat than when not properly fitted.
