 much needed soil elements for a better crop next summer. This should be done several weeks before the ground freezes solid.

Use Corn Picker Carefully

For safe and efficient operation, The Pennsylvania Farm & Home Safety Committee urges keeping the corn picker in good working condition. Otherwise, accidents are more

likely. A corn picker can snap an arm or hand as easily as a tough ear of corn. Carelessness around a corn picker and other heavy farm equipment pays off in painful accidents.

Apply Wax in Thin Coats

One common mistake in waxing smooth surface floor coverings is to apply too much wax, points out Helen Bell, Penn State extension home management specialist. A thin film hardens more quickly and gives better protection. This is because the moisture in the wax can evaporate. Thick coatings leave sub-surface wax soft and this makes the floor more susceptible to denting and surface scratches.

Use a Shopping List

You invest a sizable amount of your family's income in the food you buy. That's why it pays to plan menus ahead and make a shopping list, believes Louise Hamilton, Penn State extension nutrition specialist. A shopping list can be flexible enough to permit taking advantage of unadvertised specials or weekly sales. Yet a shopping list, even a rough one, helps to check impulse buying. Unrestrained impulse buying can skyrocket the food bill.
