

## Farm Bureau Co-op Appoints Heber Shelly To Second Spot

Heber B. Shelly, 405 W. High Street, Manheim, Penna., has been appointed Assistant General Manager and Sales Manager of Lancaster County Farm Bureau Co-operative Association, effective December 14.

Shelly has been an employee of the Cooperative for the past eleven years, serving the Man-School Teacher, member of the official Board, Church Secretary and was a member of a team area as a fieldman for seven years and as Manager of the Manheim Branch of Lancaster County Farm Bureau

Co-operative Association for the past four years.

He is a member of the Florin Church of the Brethren, serving as a deacon, Sunday

HEBER B. SHELLY

male quartette for many years.

Shelly is a Graduate of Manheim Central High School, Attended Penn State University, attended Elizabethtown College and received Keystone and American Farmers Degrees. He was a teacher in the Manheim Elementary School, also taught Vocational Agriculture, and on the job training at the East Donegal Schools.

He is married and the father of five children aged five weeks to 12 years.

## Drought Loans Are Available Through F.H.A.

Loan programs of the Farmers Home Administration can help counter the damage caused by the drought in Lancaster and Lebanon Counties, Richard W. Hoover, Local supervisor of the agency said this week.

Mr. Hoover reported that his agency provides emergency loans to help individual farmers maintain normal operations which enables them to avoid selling off foundation livestock, machinery, and other capital assets needed to operate their farms.

In addition, the local FHA county supervisor emphasized that other loan programs available to farmers and others can be of direct importance in lessening or even eliminating future drought hazards.

"FHA loans available to individual farmers, associations, and small towns finance such projects as farm ponds and other water storage construction, community water and irrigation systems, and dam and reservoir construction in small watersheds," Mr. Hoover said.

Inquiries regarding the agency's assistance in improving water supplies available to individual farmers and communities and financing operations on farms already affected by the drought can be made at the office located in the Lancaster Post Office Building, Room No. 222.

### ● Dedication

(Continued from page 12)

Modern laboratory and other well-equipped facilities of the new four-story red brick home for the Department will provide for improved services to all agriculture and the consumer public, Secretary Bull said. Except for animal disease work, all food, seed, feed, fertilizer, pesticide and other laboratories of the Department will be housed in a large wing of the new building.

The structure is expected to be ready for occupancy some time next summer. An "open house" program is planned for late summer or early fall.

A useful accessory for swimming pools is a gazebo built along one side. Roofed with an open, trellis style system of Douglas fir beams, supported on 4x4 posts, the gazebo provides a shady cooling off spot for swimmers and a place for adults to lounge in comfort while watching children. Cool gazebo will prove a favorite spot for summer outdoor living, entertaining and dining.

## PERPETUAL CONTROL of RATS and MICE for Farm, Feeder or Feed Mill

Let them steal their own poison — The secret of Ferret's great success is in the little sack. (Rats just love to carry them to their nests.)

Pat. No. 3,094,805

This new concept of baiting has revolutionized rodent control. Major stockyards, sales barns, packing houses, feed, seed, poultry and hatchery businesses now depend entirely on Ferret for rodent control.

Ferret is guaranteed to outperform other baits. Ferret does not spoil. Be free of rodents by putting out enough for a full year ahead.

Ask your dealer. If not available, order direct. 24 lb. case \$20; 12 lbs. \$14.50; 6 lbs. \$7.50; 3 lbs. \$4.
