## Why Crops Need Limestone

Two important ingredients needed by crops are calcium and magnesium. Both are regularly lost through the soil by the following ways:

- (1) By leaching, which is a slow leaking away, a normal process where there is rainfall.
- (2) By crop removals, Legumes, such as hay and other greens, are taken off the fields, instead of plowed under.
- (3) By general use of the soil.

Because of this loss, the soil becomes what is known as high in acid. Putting on limestone may supply calcium and magnesium and correct the soil acidity at the same time.

It has been shown in experiments by agricultural colleges and experiment stations that for every dollar spent for limestone, from \$3 to \$15 are returned to the farmer through increased yields.

The U.S. Government is so thoroughly convinced of the worth of applying limestone that about one-half of the cost is granted free when application is made for it. This is to encourage farmers to be certain to use limestone.

It does pay to use limestone!

## County Hatchery Has New Mgr.

Willard (Bill) Hurlburt, previously farm manager for Tar Heel Chicks, of Charlotte, N.C., has joined the Indian River Poultry Farms, Lancaster, as hatchery manager.

Hurlburt will oversee hatching and distribution operations of Indian River, a department of the Pioneer Hi-Bred Corn Co. of Des Moines.

The new hatchery manager studied poultry husbandry for three years at Iowa State University, Ames, Iowa. He was a vice president of the Iowa Poultry Association in 1962.

## Plow Contest Dates Are Set

CHAMBERSBURG — Pennsylvania's top plowmen will compete July 29 for the 1964

state plowing championships on a Franklin county farm, near Edenville, 7 miles west of Chambersburg.

Site of the 1964 meet will be the 200-acre Daniel W. Rumlter farm, with Paul Knepper, operator, as host farmer. The competing plowmen, all of them county champions, will have fifty acres for demonstrating their prowess in manipulating tractor-drawn moldboard plows.

## ATTENTION, MR. FARMER, You're in the Limelight!

Representatives of Butler Manufacturing Company—a major source of products and services for agriculture since 1901—are now in this area interviewing a number of progressive farmers concerning their farmstead expansion plans. This survey is the initial step in Butler's plan to appoint a franchised Agri-Builder to serve those interested in more profitable farming operations. The Agri-Builder not only will carry a complete line of quality farm products, but also will be qualified to assist farmers in their expansion planning, construction and financing. Butler believes the establishment of an Agri-Builder will mean improved farmstead efficiency and increased profits for the farmers in this area, as similar Butler dealerships have accomplished in communities throughout the Midwest.

Factory Representative: John A. Joyce — Ph. Lancaster 872-8561

# Milk your cows for all they're worth (most producers don't)

Get all the milk you can out of your cows. Chances are they could be giving more milk than you're getting now. So feed 'em Pioneer. It helps your cows produce up to their full bred-in capacity. Because Pioneer makes the feeds with balanced amino acids for better protein building. Amino acids are the basic building blocks for all proteins. Balance them and you get top production and top profits. How do the Pioneer people know this? They've been in the feed business for more than 90 years. Their scientific research has developed feeds formulated to the genetic capacity of herds in this area. Pioneer builds big healthy calves that develop into high-production, high-profit milkers. And when dry cows freshen, Pioneer gives them all the nutrients they need for producing more milk than before. Let us show you how you can milk your cows for all they're worth. Come in or call soon.

SINCE 1870
