

BLUE RIBBON WINNERS IN THE 4-H Forestry club roundup are, left to right, Robert Henry, New Providence R1, David Fyock, Lititz R1, and Dale Shenk, Lititz R3. L. F. Photo.

● 4-H

(Continued from Page 1)
R1, and Dale Shenk, Lititz R3, shared blue ribbon honors with combined scores for exhibit and project records in forestry projects.

Judge, James Williams, District Game Protector, put the top wildlife award on the exhibit of Miss Annette Long, Lititz R3. Miss Long, a third year member, exhibited a model of a beaver lodge complete with dam and water. Her exhibit included a stump of a tree felled by a beaver, sticks

and twigs barked by beavers, a lamp he had made from deer antlers and chips picked up at the site of a beaver dam. A mounted beaver completed the display.

Eric Stoner, 1051 Eden Road, a second year member, displayed bird feed and feeder.

First year member, Michael Hosler, Manheim R4, displayed several home made bird feeders to win top spot in that display.

Get the BIG silo unloader value!

VanDale

Delivers more silage faster!

- Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.
- Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.

Patented 3-point suspension keeps unloader level at all times and centered for more efficient operation

DELIVERS BETTER SILAGE TOO!

The double augers, operating in conjunction with the patented V-paddle impellers, dig the silage, mix it thoroughly, and then throw it down the chute. Your cows and cattle get good, palatable silage... not a powdered mash as so often happens with unloaders using blowers.

TWO SIZES:

Standard—for silos 10' to 16'
Heavy Duty—for silos 12' to 30'

● Carcass Show

(Continued from Page 1)
They were not part of the swine producers association show and sale on Tuesday.

Younkin said hog carcass quality was high, but noted several soft loins in the dressed sides. He could offer no explanation for the soft loins, but said it appears to be connected with excitability of the hogs before slaughter.

Exhibitors who have a large number of stock on the show circuit seem to have more trouble with the problem, he said.

A spotted barrow shown by C. Warren Leininger, Denver R2, was given the top score in the carcass class. The 210 pound barrow had only 1.5 inches of backfat while showing a 5.4 inch loin eye and dressing out a whopping 38.1 per cent ham and loin.

The top seeded hog in the on-foot evaluation placed second in the carcass class while Leininger's home bred entry was not considered in the final placings on Monday.

Hanging second in the on-rail judging was the 220 pound Yorkshire of John H. Henkel, Willow Glen Farm, Strasburg R1. The gilt dressed out 37.4 per cent ham and loin with a 4.3 inch loin eye and only 1.2 inches of backfat.

Park Thomas, Beavertown

had a Yorkshire in third place on-rail. His 205 pound Yorkshire had 37.5 per cent in ham and loin, a 4.6 inch loin eye and a 1.3 inch backfat covering.

Care of Marble

A marble top table needs the same gentle care as wood, remind Penn State extension home management specialists. Usually washing with clear water and a soft cloth is all that's needed, but if marble is heavily soiled, use soft water and mild soap or synthetic detergent. Rinse well, then wipe dry. Never use harsh abrasives or acid or alkaline cleaners on marble.

Poor weather is never an excuse for poor driving.

Same Uniform Feedmaking Plus 13 New Features

This is a good time for a Mix-All demonstration! There are 13 new features to show you.

Come on in. You'll see the new auger feeder drive that loads ingredients at hundreds of speeds. See the high-speed unloading transmission that empties 2 tons of feed in 5 minutes. Then, there's the new concentrate hopper at the rear, the calibrated tank, and 9 other new and useful features.

GRINDS, MIXES, DELIVERS RATIONS

ONE THING GEHL HASN'T CHANGED, though. The Mix-All still grinds and mixes with uniform precision. In the mill, 66 thin, reversible steel hammers cut (not pound) ingredients on a big 507 sq. in. grinding surface. The ration is thoroughly mixed in the 2-ton hopper.

We'd like to prove all this with a demonstration. Why not ask us?
