DO YOU GROW
PULLETS
TO MAKE
A PROFIT?

Of course you do. We suggest that you consider the Purina controlled feeding plan for these reasons:

1. Helps you lower cost about \$12 per 100 pullets grown, according to Purina Research Farm tests.
2. Grows a leaner, slower-developing pullet that lays more eggs and larger eggs when she comes into production.
3. Grows a hardy bird that lives better under the strain of heavy production.

The Purina Plan is easy to follow. Ask us about it before your chicks are 8 weeks old.

LOW COST PRODUCTION...

Dairy Show

(Continued from Page 1)

Southern County club will be shown on the first day and all other breeds will be exhibited on the second day. Fitting and showing champions from the black and white breed will be held overnight to compete for grand championship.

Leaders decided that each club should elect a caretaker to stay overnight at the sales barn. Because of lack of sleeping facilities, all other club members will be asked to go home overnight.

A committee of club leaders, one from each club, was appointed to make arrangements and plan the judging program.

They are, Raymond Witmer, Willow Street R1, Guernsey, Chairman, Leroy Welk, Strasburg R1, County, Holstein, Robert Goff, Quarryville R3, Southern Holstein, Kenneth Eshleman, Elizabethtown R1, Ayrshire, William Arrowsmith, Peach Bottom, Jersey, and Robert Mast, Narvon R2, Brown Swiss.

The clubs will pay \$50 for the use of the facilities for two days, a tent will be rented for a show ring.

We know several fellers who think they are swell guys, just because they're all puffed up with their own importance.

Soil Stewardship Week Is Noted

Our Kind Heavenly Father, Giver of all good gifts! As we partake of this food and drink, may we realize That you willed it so in the Beginning. May we know that Thy promises are everlasting. Give us wisdom, O Lord, that we may know Thy will. Give us courage to do Thy will. Convince us that we really own nothing, but that by Thy grace we are stewards of Thy many resources and that Thou dost rejoice in the service of a good and faithful steward. As this food and drink restores our strength and energy may we render pleasing service to Thee. Help us to be worthy of Thy many blessings. All of this we ask in Jesus' Name.

Amen.

The official blessing of the National Association of Soil and Water Conservation Districts, adopted in 1955 and written by W. F. Hall, Sparta, Georgia.

MAKE BARN SAFE

Early spring is a good time to make a safety check of the barn. Agricultural engineers at The Pennsylvania State University stress having ladders and stairways sound and uncluttered, providing protection around loft doors and feed and hay chutes, repairing barn floors, and lighting dangerous corners.

Get the BIG silo unloader value!

VanDale

Delivers more silage faster!

- Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.
- Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.

DELIVERS BETTER SILAGE TOO!

The double augers, operating in conjunction with the patented V-paddle impellers, dig the silage, mix it thoroughly, and then throw it down the chute. Your cows and cattle get good, palatable silage... not a powdered mash as so often happens with unloaders using blowers.

TWO SIZES:

Standard—for silos 10' to 18'
Heavy Duty—for silos 12' to 30'
