VOL. 9 NO. 27

Lancaster Farming, Saturday, June 6, 1964

\$2 Per Year

## Top DHIA Herd Has Just "Ordinary" Cows

Stanley G. Greiner, owner of but several of the younger Mount Hope View Farm at cows and heifers are SPABC Manheim R4, describes his Ivanhoe daughters.

One Ivanhoe daughter who goes by the barn name of "Liza" made more milk as a first calf heifer than any other heifer Greiner ever raised. Liza made 694 pounds of butterfat in 17,460 pounds of milk during her first 305 days. Now, in the second month of her second lactation, she has made as much as 96 pounds of milk per day.

Greiner said this week he believes the records are the result of two things: plenty of silage fed about 11 months of the year, and giving young cows a chance to prove themselves.

"I have only ever beefed one first-calf heifer for low production," he said, and added that many of his cows make good records in later lactations.

He pointed out several cows sired by Southeastern Pennsylvania Artificial Breeding Cooperative's Lucifer Star which were disappointing during their first year of production but got better every year.

His herd, all home bred, has a large proportion of Lucifer and Lucifer Star daughters,

but several of the younger cows and heifers are SPABC Manheim R4, describes his Ivanhoe daughters.

Greiner said Liza was born on pasture and lost her navel cord on the way to the barn. An attempt to stop the bleeding resulted in an infected navel which the veterinarian said would be fatal. However, he gave her an injection and the calf began to grow. She is now one of the outstanding cows in the 23 cow milking string, but she was not the top record producer last year.

A four year old Holstein with the unlikely name "Wimpy" made 761 pounds of butterfat and 19,232 pounds of milk in 305 days.

(Continued on Page 12)

LIZA PRODUCED MORE THAN ANY other first calf heifer in the herd of Stanley G. Greiner, Manheim R4. This Ivanhoe daughter made 694 pounds of butterfat in 17,460 pounds of milk during her first 305 days of production. During her second lactation she has produced up to 96 pounds of milk in one day.

## Extension Home Economist Hired; County Men Will Begin Duties On June 15

Joanne K. Warner has been named assistant extension home economist in Lancaster county. T H Patton, director of the Cooperative Extension Service, The Pennsylvania State University, announces her appointment as effective June 15.

A native of Altoona, Miss

Warner is a graduate of the Altoona Catholic high school. She received her bachelor of science degree in home economics from Seton Hill College early this month.

Miss Warner is a member of Kappa Omicron Phi, professional home economics sorority, Alpha Lambda Delta, scholastic honor society, and the Pennsylvania and the American Home Economics Associations. During summer vacations she

## County Men On Stock Show Committees

Six Lancaster County men have been named on committees to handle three sales of live animals and a carcass show and sale in conjunction with the 8th annual Pennsylvania Livestock Exposition.

Max M Smith, County Agriculture Agent, will be on a committee to arrange the feeder calf sale scheduled to begin at 10 a.m. on Thursday, November 12. The feeder calf sale committee will be chaired by Ben Morgan of the Pennsylvania State University.

Carl Dalton, Lancaster, will serve under the chairmanship of Glenn R. Kean on a committee to plan the carcass show and sale.

The market livestock sale committee will be headed by Robert Heilbron, Lancaster, who will be assisted by Walter M. Dunlap, Jr., Chris C. Kunzler, both of Lancaster, and John Gingerich, New Holland. Champions from both the live market classes and the carcass show will be auctioned off at 2 p.m. on the same Thursday.

All sales will be held in the (Continued on Page 4)

June 11 — Berks County wool pool at the Reading fair (Continued on Page 10)

JOANNE K. WARNER

worked as a recreation director and a salesperson.

Her parents, Mr. and Mrs. M. J. Warner, live at 2603 1/2 Fifth St., Altoona.

In Lancaster county, Miss Warner will be associated with Mrs. Doris W. Thomas, home economist, and Max M. Smith, Victor W. Plastow, Winthrop Merriam, and Arnold G. Lueck, county agents. Their offices are in the Post Office Building, Lancaster.

## Greiner Herd Tops DHIA

The purebred Holstein herd of Stanley G. Greiner, Manheim R4, had the high butterfat average in the Red Rose Dairy Herd Improvement Association in April.

The 20 cow herd averaged 69 pounds of butterfat in 1,794 pounds of milk with a 4.0 per cent test. (Continued on Page 12)

## Farm Bureau Market Co-op Settles For 1962 Tobacco

Final settlement on 1962 crop tobacco will net Farm Bureau Marketing Cooperative members a return of 26 1/2 to 28 3/4 cents a pound for wrapper leaf.

Checks totaling \$170,773 have been mailed to 196 member growers, according to Mark Hess, marketing director.

Hess said the checks would represent a total return to the grower of 26 1/2 to 27 3/4 cents with one cent being retained as working capital in the cooperative. This one cent is the

property of the grower, but must be retained to perpetuate the cooperative, he said.

The cooperative, organized two years ago to assist growers in stabilizing the market for Pennsylvania Seedleaf cigar filler tobacco, sold its entire holding of 1962-crop wrappers in April.

The bulk of the two million pounds of the crop was bought by one major cigar manufacturing company.

The 1962-crop filler and pull-off grades, for which the cooperative advanced members 14 and 15 cents a pound, were sold last spring and final settlement checks were issued last February.

The top grade of 1962 wrapper tobacco (C2), on which the co-op advanced 19 cents a pound at the time it was received, averaged 33 3/4 cents a pound from its resale. (Continued on Page 6)

## Freeman Urges Dairy Month Celebration

Secretary of Agriculture Orville L. Freeman today urged consumers and the food industry to join in the 28th anniversary of "June is Dairy Month," to be celebrated by the dairy industry this month when milk and its many products reach peak production.

"The month of June is a particularly good time to pay tribute to the Nation's dairy-men for their contribution to the abundant food supply we all enjoy every month of the year," the Secretary said.

"Milk and dairy products play a vital role in the health and well-being of all Americans, young and old," the Secretary said. (Continued on Page 10)

## FIVE-DAY WEATHER FORECAST

Temperatures during the next five days are expected to average near the normal range of 58 at night to 81 in the afternoon. Little day to day change is expected. Precipitation may total less than 0.1 inch falling as scattered showers about the middle of the five day period.
