**Selected Beef Cuts Are Featured**

Selected cuts of beef and poultry command attention at area meat counters this week. Rib roasts and loin steaks will be beef cuts wearing sale signs. Chuck roasts and round steak may be found at special prices in some stores. Fryer chickens, either whole, cut-up, or parts, are being featured by many area stores. Retail fresh pork prices have begun their seasonal price advance.

**Lamb Featured This Week**

Lamb will be featured in food stores throughout Pennsylvania beginning this week. It's Lamb BQ Time. Because of an increased interest in lamb production in Pennsylvania, the Department of Agriculture is coordinating a program to promote lamb for outdoor cooking this summer. Lamb is quite adaptable for outdoor cooking because of its young tenderness and fine delicate flavor. If you're cooking out soon—why not try lamb.

Vegetable Values Increasing

Unseasonable weather in many producing areas earlier this spring has resulted in reduced supplies and above average prices to date. Supplies of many items started to pick up last week. Better quality and lower prices will be noted for cucumbers, peppers, radishes, corn, tomatoes, and summer squash. Asparagus is still available but the season is just about over for this year. Medium yellow onions are costing more for the first time since early February. Potatoes remain fairly high priced as the switch is being made from old to new supplies.

**More Fruit Available**

This will be another big week for strawberries in most parts of Pennsylvania but the season will start to taper off

next week. Cantaloupe and watermelon are better buys. More peaches are coming to market as the Southern season progresses but prices and quality are way below average because of the March freeze that destroyed more than half the crop in many areas. But a bumper crop is now in prospect for Pennsylvania. Plums, grapes, nectarines, apricots, and sweet cherries are now available in most stores.

**with a NEW JOHN DEERE combine**

The new John Deere 45 Self-Propelled can do up to percent more work than its 1963 counterpart—up five days' work in four days' time.

Main reason for this terrific performance increase is the new, exclusive cell-type separating grate. It reduces the load on the walkers and allows you to speed up to ¾ gear without increasing grain loss . . . without incurring a single penalty.

Bigger grain tank, faster unloading, higher unloading auger, and redesigned operator's platform are just a few of the other improvements in the 45 Combine. Stop soon and get the full story. Credit available.
