John O. Pepper Retires From Penna. State U.

John O. Pepper, professor and section chairman of entomology in the Cooperative Extension Service at The Pennsylvania State University, retired July 1 after serving on the Extension staff for 32 years. At a meeting of the University Board of Trustees, June 12, he was given the rank of emeritus professor of agricultural extension.

A native of Easley, South Carolina, he was graduated from Clemson College where he received a bachelor of science degree in entomology in 1923. He received his master of science degree from Ohio State University in 1925.

In 1928 Mr. Pepper began work as Extension entomologist at Penn State. His service was interrupted in 1930 when he began a four-year assignment as Advanced Entomologist with the Pennsylvania State Department of Agriculture. Prior to this employment, he was Extension entomologist in South Carolina for three years.

Mr. Pepper has been chairman of the entomology section since 1944. He has conducted his program in every county of the state with major responsibility for the south

central region. Mr. Pepper feels that the accomplishments and progress of entomology Extension work through the years has been a team effort and credits his staff for the progress, growth, and achievements of the program.

Mr. Pepper relates that when he began work in the state there were about three insecticides. Presently there are about 80 in use. He recalls that in early years, the majority of his time was spent assisting fruit growers. Now, all phases of agriculture are reached, including assistance to rural, suburban and urban communities.

He is particularly pleased to have contributed to the development of 4-H insect club work in the state and the in-

terest that boys and girls have in this kind of educational project.

He assisted also in setting up a system of recordkeeping for rapid insect identification and helped develop a collection of over 6,000 slides for identifying insects.

Upon retirement he hopes to continue his hobby of collecting aphid specimens and plans to travel throughout the United States.

MRS. JOHN J. OGDEN
 By Edward J. Ogden
 Power of Attorney

Mr. Dairyman: Would you spend \$1.00 to get \$3.00 in return?

Of course you would. Here's how!

Money spent for dry cow feed, if of the right kind and properly used, is like loaning money on sound collateral to be repaid in 90 days on the basis of \$3.00 return for each dollar loaned.

Feeding your dry cows the PIONEER way, may return your feed dollars back to you three-to-one.

A dry cow, fed only 600 lbs. of PIONEER DRY & FRESH may return as much as 2000 lbs. more milk.

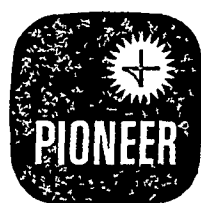

PIONEER DRY & FRESH and THE PIONEER FEEDING PROGRAM gives the dry cow the nutrients she needs to maintain body reserves, produce a vigorous, healthy calf, and freshen strong, ready to go into top production and maintain the pace right through her lactation.

So why not put some money into that bank you have in your barn, and get it back three to one.

There is profit in PIONEER.

Stop in soon or ask our servicemen about the PIONEER DRY COW FEEDING PROGRAM.

REMEMBER there is a PIONEER FEEDING PROGRAM to fit your need.

... the feeds with balanced amino acids for better protein building
