Complete automatic feeding for DAIRY COWS and CATTLE!

VanDale SILO UNLOADERS

Double augers deliver more silage
 per minute even when silage is
 deeply frozen . . . and at a lower
 operating cost. Patented V-paddle
 impellers throw . . . not blow . . .
 silage down chute. Adjustable drive
 hubs give positive traction in all
 types of silage.
 Three-point suspension keeps
 unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs

Straight-out Auger Feeder

With VanDale units you can custom build
 the bunk feeding set-up to fit your needs.
 Drive section includes hopper, drive
 assembly and 10', high capacity 9" auger.
 Additional auger sections are in 10' units
 and are easily coupled.

Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder. High
 capacity 9" auger rotates within tube. Gives
 all-weather protection, even feed distribu-
 tion, and lower operating cost.

Conveyor Trough

An important link in automatic feeding.
 Positioned below silo chute, the VanDale
 conveyor trough carries the silage to the
 bunk feeder. Primary section includes hop-
 per, drive assembly, and 10', 9" auger.
 Additional 10' auger sections may be
 added.

See us for modern automatic feeding equipment
