Rules For Safe Tractor Driving

Eight rules for safe operation of farm tractors were listed today by State Agriculture Secretary Leland H. Bull "particularly for the benefit of the many young men and boys who are doing farm work this summer for the first time."

- He offered these suggestions:
1. Drive slowly—for safety and for greater efficiency. Tractors are designed for power, not speed.
 2. Drive cautiously. A hidden hump or ditch can flip the machine over or pitch the operator off.
 3. Drive on public highways only when absolutely necessary, and then preferably when traffic is lightest.
 4. Use extra caution on slopes. Avoid those that are too steep.
 5. Climb steep grades in reverse to avoid flipping the machine over backward. Going down grade keep the machine in gear, but don't try to handle heavy loads.
 6. Pull only from the drawbar. A load hitched to the axle or seat bracket can pull the tractor over backward.
 7. When pulling really heavy loads, add front end weights to keep the tractor balanced.
 8. If the tractor wheels stick in a ditch or deep mud-hole get help. Something must turn when power is applied. If the wheels can't, the rest of the tractor will.

and then preferably when traffic is lightest.
 4. Use extra caution on slopes. Avoid those that are too steep.
 5. Climb steep grades in reverse to avoid flipping the machine over backward. Going down grade keep the machine in gear, but don't try to handle heavy loads.
 6. Pull only from the drawbar. A load hitched to the axle or seat bracket can pull the tractor over backward.
 7. When pulling really heavy loads, add front end weights to keep the tractor balanced.
 8. If the tractor wheels stick in a ditch or deep mud-hole get help. Something must turn when power is applied. If the wheels can't, the rest of the tractor will.

NEW CASE DYNACLONIC DIESEL

Starts fast... gets more work from fuel!

Model 530 3-4 plow

Controlled turbulence in the combustion chamber makes Case Dynaclonic pay off BIG in faster starts, cleaner burning and greater fuel efficiency. This amazing 3-4 plow diesel... made in America by Case... has the ruggedness and ground-hugging traction you need for heavy work—the compactness and maneuverability you like for all-around utility. Eagle Hitch or flexible 3-point hitch that mounts most any 3-point implement. Dynaclonic diesels also available in 3-plow and 4-plow sizes. We're ready to demonstrate!

- 4 TRANSMISSIONS... Case-o-matic Drive... Standard 4-Speed... Tripl-Range 12-Speed... 8-Speed Shuttle.
- 4 MODELS... Dual Front Wheel... Single Front Wheel... Adjustable Front Axle... Standard 4-Wheel. Other models of spark ignition tractors available in the same horsepower range.
