

● Have You Heard?

(Continued from Page 9)
Some Guides to Buying Towels

Look at the loops carefully. Surface loops do the drying so if loops are thick and closely packed, the towel dries the body quickly and holds moisture without letting it soak into the ground weave. Such a towel dries quickly after use.

The underweave must be able to stand the tugging and pulling and also hold the loops firmly in place.

For towels that will need to take rugged treatment, look for those with thick, densely packed loops and a firm, tight underweave. You can see this easily at hems and borders.

Hold the towel up to the light. If you see uneven and thin spots, you can be sure the towel can take little wear because it's loosely woven.

Look at the selvage. In high-quality towels, there's strength in a closely woven selvage. When correctly made, hemmed or edge-stitched selvages give satisfactory wear.

A towel has three requirements. To absorb moisture from wet skin, to bear the strain of tugging and pulling, and to dry quickly after use.

If you wish to preserve your own or your daughter's wedding gown for the next generation, send the gown to a reliable drycleaner before storing it. Ask the drycleaner to hand dryclean it. When you pack the gown, use plenty of tissue paper between the folds, then store the gown in a cool dry place to avoid mildew.

FARM WOMEN 14 HEAR MRS. JAMES RAPP

Society of Farm Women 14 met Wednesday afternoon at the home of Mrs. Roy H. Book, Ronks R1. The following members acted as assisting hostesses Mrs. Charles Murray, Mrs. Ellis Esbenshade, Mrs. Vincent Hershey, Mrs. Joseph Nolt and Mrs. William Dean.

Members of Society 25 were entertained at this meeting. Mrs. James Rapp, Lititz, was the speaker. Her subject was "The Teenage World."

A donation of \$10 was given to each of the following the United Campaign, Needlework Guild, Arthritis and Rheumatism Foundation. The Society will be entertained by Society 18 at Manheim on Sept 26.

The October meeting will be held on Wednesday, Oct 14 at the home of Mrs. Clarence Groff, Strasburg R1. The annual dues are payable at this meeting.

4-H Club News

LANCASTER 4-H COUNTY COUNCIL

by Eric Stoner

The Lancaster 4-H County Council met on Thursday evening, September 3, to begin planning a return exchange between Lancaster County and Larimer County, Colo., 4-H Clubs.

Last June 19-24, thirty-one 4-H'ers from Larimer and Jackson Counties in Colorado, visited here as guests of county 4-H members. They toured the Amish country and saw the sights of the county before going to the World's Fair. All persons involved seemed to learn something from the five short days that the Colorado youngsters were here.

Now, the Lancaster County 4-H'ers who hosted the boys and girls from Colorado have been invited to come to Colorado to complete the exchange. The tentative date for this trip is June 20, 1965.

The Council decided that now is the best time to raise the money which will be involved in the exchange next summer. To raise the needed amount, the County Council will have refreshment stands at the Solanco, New Holland, Ephrata and Manheim Farm Shows.

A lot of help will be needed

The fashion show began at 7 P.M. The narrator was Miss Grant C. Smith of Ephrata RD 2.

There were nearly 70 people present, and there were 28 girls in the fashion show.

After the show the mothers were served punch, potato chips, candy and cookies.

OFF TO ENGLAND

Richard Psolla, of Camp Hill, Pa., local representative for the Quaker Oats Co. will leave for England on September 23rd. His job there will be to train personnel in preparation for introducing a new feed plant which Quaker Oats plans to build in Southall, England.

Until Psolla returns on December 15th, his job here will be filled by Bill Bromley, of New Kensington, Pa.

JOLLY STITCHERS

The Jolly Stitchers 4-H Club of Farmersville held a fashion show and mother's tea on September 2 at the Hans Groff School in Farmersville.

Checkerboard News

Raise bigger, better calves... THE PURINA WAY!

The success of the Purina Calf Feeding Program is clearly written in Purina Research Farm records. Of over 2200 calves born—all raised on Purina calf starting programs—less than 1% failed to grow to maturity.

Recently, a Purina Farm Holstein calf weighed 409 lbs. at 4 months—137 lbs. heavier than the normal breed average. And a 4-month-old Guernsey weighed 322 lbs.—105 lbs. above the normal breed average at 4 months!

Next time you start calves, order Purina Nursing Chow and Purina Calf Startena—palatable, power-packed products—at our store.

LOW COST PRODUCTION... the reason why more farmers feed PURINA

FOR THE QUALITY THAT MEANS

Bigger Yields

PENNRAD Certified Barley is a new variety developed at Penn State. It carries all the good yielding and winter hardiness characteristics of Hudson, but without the troublesome beards. Has good resistance to the disease which commonly attack barley. Stiff straw. Supply of seed limited.

WONG Certified Barley remains an old favorite. Heavy-yielding, beardless. Hoffman foundation stocks are hot water treated for smut control.

REDCOAT Certified Wheat is a remarkable new variety that has created more favorable interest than anything we've seen in many a year. A consistently high producer in tests at Penn State University, with highest yield of four recommended varieties in 6 of the 8 years tested. Strong straw. Noted for winter hardiness, resistance to mildew, rust and Hessian Fly.

Other high-yielding Hoffman wheat varieties are **PENNOLL**, **SENECA** and **DUAL**.

NORLINE Certified Winter Oats are more hardy than older varieties of winter oats. A good yielder with good bushel weight. A strong favorite in Southeastern Pennsylvania, Maryland and Delaware.

See your Hoffman Seed Man or Phone 898-3421 for full details.
