

Feeder Calf Sale At Stock Yards

The 10th Annual Lancaster Feeder Calf Sale will be held at the Lancaster Union Stock Yards in their new sales pavilion, Friday, October 30, 1964. Sale starting at 1:00 p.m.

Consignments will arrive Thursday, October 20, for tagging, weighing and grading and will be on display Friday morning.

This sale is sponsored each year by the Lancaster Livestock Exchange in the very heart of the Eastern cattle feeding area to offer livestock breeders the very best market outlet for their feeder calves, giving opportunity to Baby Beef clubs and cattle feeders to secure purebred stock to fill their requirements.

Entries received thus far indicate there will be a broad selection of calves available representing all major breeds and crossbreeds. Three states, Pennsylvania, Maryland and Delaware will be represented with consignments.

There will be Fancy Club calves, sold as singles for club work, Choice quality in singles and larger lots and many other lots of Medium and Good calves. Heifer calves will be available in substantial numbers. All will be graded and certified by a grading team made up of Thomas King, Penna. State University

Livestock Extension Specialist; M. M. Smith, County Extension Agent; Arthur MacArthur, Port Deposit purebred expert.

Following the Feeder Calf Sale there will be a Special Feeder Sale of calves and yearlings consigned by members of the Livestock Exchange to supplement the numbers, so all orders will be filled. This will be the biggest feeder sale of the year in Lancaster.

4-H Club News

4-H BABY BEEF ENROLLMENT PERIOD

Farm boys and girls desiring to feed a steer calf for one of the 4-H Baby Beef Clubs should enroll by this weekend (Oct. 19th). Club members are required to start with a small beef steer calf (300 to 450 pounds) of either the Angus, Hereford, or Shorthorn breeds and finish him for one of the shows next fall or winter. Two clubs are active in Lancaster County: the Red Rose Club, which is the county-wide club, that feeds for State Farm Show; and the New Holland group that feeds for the New Holland Farm Show.

Interested boys and girls, 10 to 18 years of age, are to contact M. M. Smith, 202 P.O. Bldg. Lancaster. The calves will be distributed to the club members next month.

belt. From there they are moved to another auger that carries them to the feed bunk, or to a wagon for transportation to another farm. The corn runs through a crimper before it drops onto the belt, and is crimped at the rate of 400 bushels per hour. The wagons can be loaded with corn and haylage at the rate of six tons in 12 minutes. Eventually it is planned to put two more feed bunks at this central location. Then one-half the steers, 400, will be fed without hauling feed to other farms.

As a steer feeder you've probably been hearing for the past few years that if you are going to compete you will have to become more efficient, handle larger numbers of animals,

and consider such materials as haylage, silage, and high-moisture corn. Here's an opportunity to see most of these features all in one operation; and close to home.

In addition to caring for the sick and undernourished aboard the S.S. HOPE, the ship's medical staff also establishes outpatient clinics in various communities of the na-

Your Friendly Banker

You probably don't think of your cows as bankers, but if you put them on the Pioneer Feeding Program, they can be a sure source of steady, extra income. The goal of this high-nutrient feeding program is simple — more milk per cow. According to dairy specialists, 9 out of 10 cows don't get enough feed, or the proper kind of feed, to produce up to their genetic capacity. If this is the case with your herd, you may be getting 2,000 pounds of milk less, per cow per year, than you should. The

Pioneer Feeding Program is based on increasing feed allowance as long as milk production increases profitably. For example, as little as 600 pounds of feed invested in a dry cow returns as much as 2,000 pounds of milk. Your milking herd will respond equally well when you challenge them to milk right up to their capacity. We'll be happy to show you how you can milk your cows for all their worth. We've done it for your neighbors in this community. Just give us a call or stop in. We're friendly, too!

Here's the answer to your MANURE PROBLEMS

EASY WAY MANURE DISPOSAL SYSTEM

Saves Time—Saves Fertility

Just scrape or wash manure, bedding waste and feed into Easy Way holding tank. When you're ready, the powerful agitator and self-priming shaper loader pump will put the homogenized mixture into the Easy Way liquid field spreader. No dig — no man — no stink.

For complete information on the EASY WAY DISPOSAL SYSTEM write to:
