## Complete automatic feeding for DAIRY COWS and CATTLE!

### VanDale SILO UNLOADERS

Double augers deliver more silage per minute even when silage is deeply frozen . . . and at a lower operating cost. Patented V-paddle impellers draw . . . not blow . . . silage down chute. Adjustable drive hubs give positive traction in all types of silage. Three-point suspension keeps unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs

#### Straight-out Auger Feeder

With VanDale units you can custom build the bunk feeding set-up to fit your needs. Drive section includes hopper, drive assembly and 10' high-capacity 8" auger. Additional auger sections are 10' units and are easily coupled.

#### Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder. High capacity 8" auger rotates within tube. Gives all-weather protection, even feed distribution, and lower operating cost.

#### Conveyor Trough

An important link in automatic feeding. Positioned below silo chute, the VanDale conveyor trough carries the silage to the bunk feeder. Primary section includes hopper, drive assembly, and 10', 8" auger. Additional 10' auger sections may be added.

See us for modern automatic feeding equipment
