MILLER JOINS  
D. E. HORN & CO.

Darwin E. Miller recently joined the sales force of D. E. Horn and Co., Inc., York, Pa., manufacturers and distributors of HORNSCO Feeds in Pennsylvania and Maryland. Darwin has been associated with the feed industry for the past 14 years and is well known in agricultural circles in Northern Pennsylvania.

At the present time Mr. Miller is serving his training period, after which he will be assigned a territory for the Horn organization. Mr. Miller will reside at Valley View, Pa.

### ● Hosler

(Continued from Page 1)  
the 4-H county livestock judging team that won the state championship at Penn State University earlier this year. As state champions this team will compete in the International Livestock Exposition in Chicago on the Saturday after Thanksgiving.

Eugene, 18, is the son of Mr. and Mrs. Mark W. Hosler. He has been active in 4-H work for eight years with many projects in swine, beef and vegetable crops. He has held such 4-H offices as local club president, member of the county council, and county president. He is presently a freshman at Elizabethtown College.

# New from HOFFMAN Haymor Alfalfa

### MORE HAY

Haymor means just what its name says: . . . you get more hay. In 20 different comparison trials in northern states, Haymor outyielded Vernal by an average of 4%—and in at least one case outproduced Vernal by 22%. In six of these trials where Ranger was also grown, Haymor averaged 12% more hay than Ranger. Haymor means more hay and more profit for you.

### FAST STARTS

Haymor is noted for its excellent seedling vigor. It establishes fast to make a thick, healthy stand. Its extra vigor makes it easier to establish under more competitive conditions.

### RESISTS DISEASE

Haymor has resistance to bacterial wilt disease and has good tolerance to common leaf spot diseases. This disease resistance is another big reason why you will want to put Haymor in your fields.

### WINTER HARDINESS

Haymor has good winter hardiness . . . in the same class as Ranger. This feature, plus its good spring vigor, makes it ideal for normal rotations and general hay and pasture uses.

### LASTS LONGER

Haymor is an unusually vigorous variety that performs well under all types of soil where alfalfa is grown. Because of good disease resistance and hardiness, it lasts longer and provides better hay and pasturage.

### HOLDS LEAVES LONGER

Haymor holds its leaves extremely well. This ability to hold on to its protein-packed leaves means it makes top quality hay or silage.

### MATURES EARLIER

Haymor—similar to Du Puits—matures earlier than most other alfalfas. In fact, Haymor is only about two days later than Du Puits—3 to 4 days earlier than most U.S. alfalfa types.

### MIXES WELL

Haymor is a top producer whether it's planted alone or in combination with other legumes and grasses. Its disease-resistant features make it ideal for use in hay and pasture mixtures.
