

Glatfelter Co. Again Will Offer Seedlings

Farmers of Lancaster County are being reminded that right now is the time to plan for tree planting to be done in the spring of 1965. As in past years, The Glatfelter Pulp Wood Company of Spring Grove, Pa., will again furnish free tree seedlings to any interested and qualified landowner. Since the inception in 1951 of this Company program, more than seven million seedlings have been furnished to landowners in 13 southcentral Pennsylvania counties.

Tree species available this year under the program are white pine, Austrian pine, Banks pine, pitch pine, Norway spruce, white spruce, Japanese larch, European larch and Virginia pine. Orders are filled on a first-come basis. All trees are purchased by the Glatfelter Company from the Pennsylvania Department of Forests and Waters. The Company imposes no restrictions of any kind, but the landowner planting the seedlings must comply with normal state regulations regarding these trees. That is, they may not be used for Christmas trees, decorative purposes or for windbreaks. All trees are the property of the landowner and he may cut them at a future date for any wood products he desires.

Landowners who are planning to plant trees in 1965, and wish to receive free tree seedlings can obtain information about placing their orders from their County Agent, County Soil Conservation District office, or by writing to The Glatfelter Pulp Wood Company, Spring Grove, Pa.

Trading In Beef

(Continued from Page 1)
The brokerage firms point out that future buying will enable the beef cattle industry to use the valuable tool of "hedging", thus giving them a greater price protection than was previously possible.

As more information on this marketing process becomes available we will pass it along.

HOME ECONOMICS EXTENSION SERVICE TO HOLD ANNUAL CHRISTMAS PROGRAM

The Lancaster County Agricultural and Home Economics Extension Service will hold its annual Christmas program on Monday, November 30, in the Fellowship Hall of the Grace Lutheran Church, North Queen and James Streets, Lancaster.

The doors will open at 7:30 p.m. allowing time for browsing among the exhibits of Christmas decorations and gifts that will be displayed by Farm Women Societies and Homemakers Clubs in the county.

The program will begin at 8:15 p.m. and will feature foreign students from France, Holland and Kenya, who will tell how Christmas is celebrated in their native countries.

All interested persons are urged to attend.

Have You Heard?

tender the outside is overcooked. The smaller the pieces, the quicker they cook. So if you are in a hurry, cut potatoes into halves, quarters, or cubes . . . but do not increase the cooking temperature.

The Story Behind . . .

HPS FORMULAS

As farming has become more competitive, and profit margins have dwindled, farmers have had to aim for ever higher returns from grassland acreage, just as they have on cultivated crops. This need for greater productivity resulted in Hoffman HPS Formulas.

Hoffman has, for years, been a leader in introducing new, heavier-producing varieties of alfalfas, clovers and grasses. These "straight" items continue to be important staples in the Hoffman line.

We began to find, however, an increasing call for combinations of grasses and legumes to meet specific situations. Our attention was then focused on the scientific formulation of such combinations. The end result was the Hoffman HPS Formulas — for more profitable yields of Hay/Pasture/Silage.

In arriving at specific HPS formulations, we considered the recommendations of Experiment Stations in the states in the Hoffman selling area. We studied the preferences of our customers over the years, and the results they achieved. Field tests were studied.

Each new bit of evidence was carefully evaluated. Out of this broad program of research and practical on-farm results came Hoffman HPS Formulas — each designed to do an outstanding job in meeting a specific need.
