**Fluffing Of Carpet Or Rug Is Normal**  
Your carpet or rug is not falling apart when you notice it fluffing. This is normal for new carpets and rugs. Fluffing takes place when a rug sheds lint that has been left in the fabric.

Carpet yarn is made of various lengths of fibers. When pile loops are cut, some short ends are left in the fabric. So during the first few months you have your rug or carpet, it sheds this lint as it works to the surface. But, this isn't a carpet defect and it won't affect the wear or appearance of the carpet.

keep steps free from all items all the time. If you have basement stairs without a guard rail, spend a few dollars and a few hours work building a guard rail. It will be the best investment in safety you can make.

When carrying loads of articles up or down stairs, keep the loads small and carry them to the side so you can see each step.

Take time to wipe up spills on the kitchen floor.

Avoid scatter rugs, they may turn into flying rugs and if this happens then decorative value can be offset by medical costs in case of an accident.

A good stepladder is a worthwhile investment. A chair or box is a poor substitute and can be a costly one.

**Worth Knowing**

It's wise to start cooking potatoes in boiling water. And when the water has reached boiling, reduce the heat to just bubbling — never violently boil a potato. Boiling cooks the outside before the inside, and by the time the inside is
