

**why a Wayne Pullet Program is good for your pullets . . . and you too!**

Laying house failure can often be traced back to a poor pullet. Good pullets, properly fed and managed, can pay off in the laying house. The Wayne Pullet Program sets the stage for better egg checks this fall by producing pullets with a minimum of fat, at the correct stage of sexual maturity, ready to lay at a high rate. It's easy to follow, too.

Start with Wayne Pullet Starter from 0 to 8 weeks. From 8 to 22 weeks select either 14% Pullet Developer, 17% Universal Grower or 22% Pullet Grower. Stop in soon to discuss the Wayne Program designed for you. Your egg check later will prove you were right with Wayne now.

latter has not been determined.

Members of the Campaign Steering Committee, meeting this week, were informed by Area Chairmen in the Farm Gifts Division, that volunteer canvassers have been recruited in half the districts of the county, thus far, and that the remaining workers required will be reported by the early part of January. Brubaker and Skromme, indicated that the response has been highly encouraging and that District Chairmen deserve the credit for performing a very prompt piece of service. The Farm Gifts Division carries responsibility for the highest portion of the over-all campaign goal. It has been assigned a quota of \$250,000 to be raised on the part of farm families, and businesses related to the service of agriculture. Gifts of industries, city-centered businesses, and many selected individuals, will be counted upon to help raise the remaining \$125,000 to be sought in the campaign.

Upon completion, the Center would provide a centrally-located facility for meetings of adult and youth organizations associated with agricultural interests, will house a number of agricultural advisory agencies, such as the Agricultural Extension Service, in offices which will help produce operating revenue for the Center's maintenance; and will be used as a focal point for sponsoring educational lectures, exhibits and conferences of a wide variety, under auspices of the Foundation's Board of Directors, 4-H Club groups, Farm

Women's Societies, and numerous other groups.

The under-taking has been endorsed by practically all agricultural organizations, the Lancaster Chamber of Commerce, the Manufacturer's Association of Lancaster County, and a "Citizens' Committee" numbering more than 100 prominent city and county men.

● **Tobacco Show**

(Continued from Page 1)

consist of 15 leaves tied with another tobacco leaf. M. M. Smith, County Agricultural Agent, advises exhibitors to select leaves that are uniform in size, color and texture and free from insect, disease, or mechanical damage. The Filler B types of tobacco are usually heavier in texture, while the Wrapper B is of medium weight leaf, chestnut brown color with good stretch, Smith advises. The Binders should have a very thin, silky leaf, light chestnut color, with plenty of life and stretch.

Unless the exhibitor states otherwise, all exhibits entered in the County Show will be taken to the State Show, according to the County Agent. Growers not exhibiting at the County Show, but desiring to do so at the State Show, may bring their exhibit to the Farm Bureau Building on January 8 and the County Extension Agents will see that it gets to the Farm Show. The tobacco should be well-wrapped to prevent drying out, Smith cautioned.
