

Give these Musser Pullets an opportunity to demonstrate their exceptional laying ability during the hot summer and early fall months. A quality that is needed to give that extra profit.

MUSSER M327 LEGHORNS
100% — 92% — 69.1%

Heavy line shows position of Musser Leghorns among all pens in the 1964 Pa. Random Test in respect to egg production. This is from the start of 50% production and is projected for 2 months beyond end of test. This strong ZIP in production comes when many other pens are fading—when egg prices are strongest. Other Musser features: 100% Chick livability; 92% Laying House Livability; 69.1% Hen-Day Production.
