● Have You Heard?

(Continued from Page 15) ing all electric appliances and connections periodically **Worth Knowing Anytime** Make miniature sandwiches for the children, using a smaller amount of meat or cheese on a small roll or one

Remarks were made by A. N Ranck, supervising principal, T. M. Malin, area supervisor of Vocational Agr, and Roy Slaymaker, vice president of the Penna. FFA Association.

slice of bread Children like the idea of having their food scaled to their size and there isn't the temptation to play with what's left of the large sandwich Also, less food will be wasted with the small sandwich

The flavor, aroma, and color of honey vary with the flowers that provide the nectar for the bees that make the honey. Usually, the mildest honeys come in the lightest colors More than half of the honeys produced in the United States are mild sweet-clover, clover, or alfalfa honey Other distinctive-flavored honeys come from orange and other citrus blossoms, tupelo trees of the South, wild sage, cultivated buckwheat, horse-mint, basswood, and the tulip tree. Buckwheat honey may claim to be the darkest table honey

Uses for Bacon as a Seasoner Double the amount of the breakfast bacon you pan-fry, broil, or bake. Crumble the leftover pieces and use in one or more of the following ways

Add to muffin batter just before pouring into baking cups

Toss with crisp salad greens, then use an oil and vinegar dressing

Use as a seasoner for fresh-cooked green vegetables, such as beans, peas, and chopped spinach

Use as a topping for macaroni and cheese casserole

Stir into peanut butter or egg salad for sandwich filling.

championship at the New Holland Farmers Fair last fall Runner-up in the area contest was Marlin Brenner of Garden Spot High School, New Holland The next three places were won by: Robert Burchett, Red Lion H.S.; Golden Shue, Southwest H.S.; Dale Greiner, Manheim Central H.S.

Transfer Milk Efficiently From Cow to Bulk Cooler

The "Sputnik" MILK-PORTER is the cleanest, most efficient method for transferring milk from cow to bulk cooler.

- Manufactured from heavy gauge stainless steel.
- Lid seals tightly to keep milk germ free.
- Passes through openings 20" and over.
- Moves quiet and easily on rubber-tired, ball bearing wheels.
- Does away with long, expensive pipe lines, milk pumps and releaser.
- Two sizes.
- Low-cost sanitizing.

DO YOUR HENS AVERAGE

280 EGGS PER YEAR?

Most layers are capable of producing many more eggs than most growers are getting. Modern hens are bred for high production. With a top-flight feeding program, modern layers continue to produce at the highest levels . . . right through life.

Of course, a layer's lifetime production depends to a great extent on the way she was raised. RED COMB pullet feeds and pullet-feeding programs can help you house healthier, more uniform pullets — can give you hens that'll be top money-makers for you.

But if your birds are already in the laying house — and if production is less than satisfactory — FEED OUT the difference between a good profit and just getting by. Remember, there's a RED COMB layer-feeding program that'll fit your operation exactly.

Stop in and see us. Let us help you develop an all-around management-for-profit program that can put dollars in your pocket.
