Baseball Team Promotes Eggs

The world champion baseball team, the St. Louis Cardinals, are among those who have joined the U. S. Department of Agriculture's Consumer and Marketing Service in calling consumers' attention to the abundant supplies of eggs this spring. All segments of the food industry, allied groups, and producers themselves have been active since January in merchandising eggs to stave off disastrously low prices. Eggs continue on USDA's Plentiful Foods List for May.

Members of that famous produced 10,330 of milk and 501 of fat, both were on test for 305 days.

Glengeran Daylos S Elinor, a 7-year old in the J. Ellis Crosshaw, Jr. herd at West Chester, produced 12,670 of milk and 581 of fat in 305 days

baseball team know the multiple nutritional values of eggs and some have spoken up for this wholesome product. The Cards' star third baseman, Ken Boyer, proud father of four children, says he buys eggs by the crate for his family. And the team's surgeon, Dr. I. C. Middleman, urges his players to eat plenty of eggs because of their high protein value.

Spearheaded by the Consumer and Marketing Service's Food Trades Staff, USDA is working with the distributive and food service industries to expand the sale and use of eggs and is supplying informational and educational materials to the food industry and consumers through the mass media.

DEFINITION

Experience: What you imagine you have . . . until you get more.

For clean corn...

Permits crop rotation

Unlike other pre-emergence herbicides, KNOXWEED leaves no soil residue. You can grow clean corn for earlier harvest, better yields . . . more profits and you get no damage to other crops planted in rotation.

Available now.
