

### Three Pa. Cows Hit 1/2 Ton Ranks

A yearly production record exceeding a half ton of butterfat has been completed by a Registered Holstein cow, San-

ger Lea Dean Princess, owned by Clarence L. Sanger, Myers-town.

The Pennsylvania Holstein's official record of production totalled 23,224 lbs. of milk and 1,000 lbs. of butterfat in

365 days. She started her lactation at the age of 7 years and 4 months and was milked two times daily.

(Sanger, Lea Dean Princess was bred in the Sanger herd. She was sired by Maplebend Dean King Posch (VG), a Gold Medal Sire.

Also two Registered Holstein cows owned by Pennsylvania State University, University Park, have completed yearly production records exceeding a half ton of butterfat.

Penstate Reflection J Hap-

py (GP) has achieved the 1,000 lb. butterfat production level in a single lactation for the second time. Her official 365-day record of production totalled 20,821 lbs. of milk, 1,005 lbs. of butterfat, and 1,896 lbs. of solids-not-fat. She started her lactation at the age of 5 years 7 months.

Completing her first yearly production record of over 1,000 lbs. butterfat is Penstate Reflection L Gay (VG). Her official 365-day record totalled 23,814 lbs. of milk, 1,124 lbs. of butterfat and

2,216 lbs. of solids-not-fat. She started her testing period at the age of 4 years 10 months.

Solids-not-fat (SNF), the nutrients in milk below the creamline, are now being recorded in addition to milk and butterfat, as a part of the Holstein Association's Total Nutrient Testing (TNT) program. Registered Holstein breeders use this information as a management tool in herd improvement.

*When she freshens...*

**WILL SHE BE A TOP PRODUCER?**

Management-for-profit the PIONEER way starts with feeding the dry cow. PIONEER feeding programs give to the dry cow the nutrients she needs to maintain body reserves, produce a vigorous, healthy calf, and freshen strong, ready to go into top production and maintain the pace right through lactation. The feed with the lowest price tag is not always a bargain. PIONEER feeds cost less because they produce more — earn greater profits. A dry cow, fed only 600 lbs. of PIONEER, may return as much as 2,000 lbs. more milk as a result, and 2,000 lbs. of milk at \$4/cwt. means a return of \$80 in extra milk production, a bonus profit.

There's profit in PIONEER. Stop in soon and talk over your operation with us. Remember, there's a PIONEER feed to fit your need.
