The members discussed a trip to the World's Fair for June 14. There were 15 members present.

A new course was planned on "Small Engine Repairs." A project on electricity was also offered.

The president, Joan Shaub, introduced the guest speakers, Dr. Champney and Dr. Charle. They are veterinarians in the Quarryville area. Club members asked questions on animals.

Meetings will be the first Tuesday of every month. The next meeting will be July 6 at 7:30 p.m. at the school.

Small Engine 4-H Club Will Be Organized In Quarryville Area

A special 4-H project club dealing with the subject of small engines will be organized in the Quarryville area on Thursday evening June 17, at 7:30 p.m. Enrollment is open to any boy 12 to 19 years old.

The first meeting will be held in the Solanco Junior High School Industrial Arts Shop, located at Third and Hess Streets in Quarryville adjacent to the Junior High School. The club will be under the direction of Gaylord Arnst, who has had considerable training and experience with small engines and is well qualified to instruct this group.

Emphasis during this six-week course will be on care and maintenance of small engines and the functioning of their component parts. Enrollment will be limited to 15 individuals.

Anyone desiring further information should contact the Agricultural Extension Office in the Post Office Building, Lancaster, or Mr. Gaylord Arnst, 104 Broadmoor Drive, Willow Street, Pennsylvania.

4-H Interstate Exchange Trip Leaves June 20th

Thirty-four 4-H members from all parts of Lancaster County will leave by chartered bus on June 20 for a three state cultural exchange program.

During the 12-day trip, Club members will live with fellow 4-H'ers and their families in Black Hawk County, Iowa, Fort Collins, Colorado, and Kendall County, Illinois. In addition to seeing a large portion of this country, Club members taking part will have an opportunity to make many new friends and have many new learning experiences.

The trip, sponsored by the 4-H County Council, is being partially financed out of proceeds from a 4-H cookie sale conducted in the county last winter; members taking the trip will make up the difference.

Moses Lapp To Report On Midwest Tour At Honey Production Meet

At a special meeting on honey production and bee management on June 15, Moses Lapp, beekeeper from the White Horse area, will give a brief report on his recent inspection tour of the tornado struck areas of the midwest.

The meeting is open to the general public. It will be held at Shenk's Fruit and Vegetable Farm, Lititz, Pa. at 6:30 p.m., and will feature an inspection of hives if weather permits.

W. W. Clarke, Jr., extension apiculturist from Penn State University, will be present for the program. Also during the evening a business meeting of the county honey producers association will be held.

For The Farm Wife

(Continued from Page 9)

1/4 cup butter or margarine, melted
4 cups herb seasoned stuffing croutons

With scissors or knife, snip fat edge of ham slice in several places to prevent curling. Place in center of large shallow pan lined with aluminum foil. Drain pineapple, reserving syrup. Mix together brown sugar, mustard and cloves; stir in about 2 tablespoons pineapple syrup. Brush generously over ham slice. Cover lightly with aluminum foil. Bake in slow oven (325 degrees) about 40 minutes. Meanwhile, beat together 1/2 cup pineapple syrup, egg

and melted butter. Toss gently with croutons. Shape into balls pressing together firmly. Turn ham slice and brush with remaining brown sugar mixture. Arrange pineapple slices on aluminum foil around ham slice; place stuffing ball on each pineapple slice. Cover lightly with aluminum foil. Return to oven and continue baking about 30 minutes, depending on thickness of ham slice.

Remove foil during last few minutes of baking. Tuck small sprig of fresh parsley into top of each stuffing ball to garnish. Serve ham slice on heated platter surrounded by stuffing-topped pineapple slices. Makes 6-8 servings.

When she freshens...

WILL SHE BE A TOP PRODUCER?

Management-for-profit the PIONEER way starts with feeding the dry cow. PIONEER feeding programs give to the dry cow the nutrients she needs to maintain body reserves, produce a vigorous, healthy calf, and freshen strong, ready to go into top production and maintain the pace right through lactation. The feed with the lowest price tag is not always a bargain. PIONEER feeds cost less because they produce more — earn greater profits. A dry cow, fed only 600 lbs. of PIONEER, may return as much as 2,000 lbs. more milk as a result, and 2,000 lbs. of milk at \$4/cwt. means a return of \$80 in extra milk production, a bonus profit.

There's profit in PIONEER. Stop in soon and talk over your operation with us. Remember, there's a PIONEER feed to fit your need.
