

Area Holstein Cows Complete SNF Records

The Holstein-Friesian Association of America recently reported that cows in five county herds had completed lactations under the association's total nutrient testing program. Their performance records include solids-not-fat (SNF) information.

The animals and their actual production levels are:

Roaring Maples Dandy Comet, a six-year-old, registered Holstein, has credits of 17,286 lbs. milk, 705 lbs. butterfat, and 1,480 lbs. solids-not-fat in 305 days. When she freshens...

WILL SHE BE A TOP PRODUCER?

Management-for-profit the PIONEER way starts with feeding the dry cow. PIONEER feeding programs give to the dry cow the nutrients she needs to maintain body reserves, produce a vigorous, healthy calf, and freshen strong, ready to go into top production and maintain the pace right through lactation. The feed with the lowest price tag is not always a bargain. PIONEER feeds cost less because they produce more — earn greater profits. A dry cow, fed only 600 lbs. of PIONEER, may return as much as 2,000 lbs. more milk as a result, and 2,000 lbs. of milk at \$4/cwt. means a return of \$80 in extra milk production, a bonus profit.

There's profit in PIONEER. Stop in soon and talk over your operation with us. Remember, there's a PIONEER feed to fit your need.
